intriguing one of all how do we know ourselves

David Myers' new partnership with coauthor C. Nathan Dewall matches two dedicated educators and scholars each passionate about teaching psychological science through writing and interactive media. With this new edition of the 1 bestselling psychology Myers and Dewall take full advantage of what an integrated text/media learning combination can do. New features move students from reading the chapter to actively learning online. How would you know? puts students in the role of scientific researcher and includes tutorials on key research design principles. Assess Your Strengths self-tests help students learn a little more about themselves and include tips about nurturing key strengths. These and other innovations rest on the same foundations that have always distinguished a new David Myers edition: exhaustive updating, hundreds of new citations, captivating writing, and the merging of rigorous science with a broad human perspective that engages both the mind and heart.

From his experience as an author and teacher, David Myers has concluded that students digest material more easily when it is presented in smaller chunks. Ask students whether they would prefer a 600-page book to be organized as fifteen 40-page chapters or as forty 15-page chapters, and their answers will approach a consensus: students prefer shorter chapters, and research on learning strategies supports this preference. Chunked material is more easily digested. Responding to student preference and learning research, Myers has created a modular version of his best-selling brief introductory text, *Exploring Psychology*, Fifth Edition. In *Exploring Psychology*, Fifth Edition in Modules, Myers reorganizes the 15 chapters of *Exploring Psychology*, Fifth Edition into 40 short chapters or modules. The modular organization offers instructors more freedom to pick and choose from a smorgasbord of topics instead of deciding whether to assign the whole chapter on consciousness. Instructors can simply assign the module on sleep and dreams, the module on hypnosis, and/or the module on drugs and behavior, given that each module stands alone and is not dependent upon the content found in other modules. Instructors can also choose to cover the modules in any order they please, featuring the latest research and teaching innovations. Myers' new text reflects the author's continuing drive to discover the most effective way to communicate psychology's major ideas to an uninitiated audience. Note: *Exploring Psychology*, Fifth Edition in Modules is now available in two different saleable versions: a) a hardcover/spiral-bound text similar in structure to the spiral-bound Myers in Modules; b) a perfect-bound paperback text. The features that have made David Myers' introductory psychology textbooks such phenomenal successes—compelling narrative, critical thinking, theme, superior design—are all present in *Exploring Psychology*, Fifth Edition in Modules. The way those hallmark features are presented is different. This is not a brief version of *Psychology*, Myers in Modules, Sixth Edition; rather, this new text is a modularized version of *Exploring Psychology*, Fifth Edition. Therefore, it enjoys all of the hallmark features of *Exploring Psychology*, Fifth Edition: SQ3R pedagogical system, terrific writing, and briefer coverage of key topics. It is, in fact, the same writing content as can be found in *Exploring Psychology*, Fifth Edition, just with a different organization.
