designing interior spaces is a task that is equally relevant as architecture landscape  
architecture and urban design for those working professionally in the built environment in  
this comprehensive work an international and interdisciplinary team of authors presents the  
essential aspects of the various fields of contemporary interior architecture and design the  
project examples are illustrated with brilliant photographs and plans they have been selected  
according to consistent criteria for all chapters of the book and represent the essential  
building types including exhibition stand design as well as a broad range of today s design  
approaches the authors place the collaboration between the various design disciplines at the  
center of focus the appendix contains information for further research all in all designing  
interior architecture is a fundamental reference work for all those professionally engaged  
with the design

in order to succeed human factors research must blend the subjective and objective aspects  
of the client s situation applying both argument and evidence how to accomplish this  
complex and very necessary goal is the subject of this book in which information systems  
research methods and evaluation procedures have been formulated as elements in an  
application strategy that makes possible the blending of research and design three main  
themes are maintained throughout the book the concern to ensure that designers know how  
to conduct human factors research in an effective and efficient manner the emphasis on  
obtaining the benefits possible when designer and client work in collaboration and the  
possibility that what is presented should stimulate thoughtful ideas about new computer  
applications or database features human factors research is fundamentally a problem of  
information development using the standardized information system presented in the book  
the promise found in human factors research can readily be realized as the research  
questions and methods given provide a strategy and means for situational analysis a  
necessary adjunct to human factors research is a means for assessing findings and  
translating them into specific design objectives criteria and specifications the evaluation

procedures described are directed toward these very complex requirements and provide a means for database development the final chapter of the book contains research strategies guidelines for establishing scopes of work schedules and budgets and suggestions for proposals for those situations in which standard fees do not provide sufficient funds for human factors research the book is written primarily for architects interior designers and students of environmental design many others will also find it of value those who employ professional design services executives who formulate policy for facility development and capital investment administrators of housing community service educational and recreational programs developers concerned with community acceptability and marketability managers of office buildings industrial plants and service and retail stores and those who plan to design their own environments all need a systematic approach to assure full benefits from their efforts and capital investments

planners architects and designers can have a great impact on living environments and well being well being is a natural outcome of natural living but it is important to realize that a real and comprehensive understanding of well being can only be achieved through the continuity of the concept to all environmental scales starting from the biosphere and leading towards interiors since interior space is one of the most important determinants of our everyday experiences its role in well being as a conscious construct needs to be the most important concern of spatial design well being design and frameworks for interior space is a pivotal reference source that proposes a framework including different dimensions of well being and that discusses the importance of each dimension through the examination of past and present living environments in an attempt to figure out the appropriate ways of thinking living and building that can lead to healthier environments and happier people factors discussed throughout the book include the history of the concept of living well the evolution of well being with age the requirements that affect well being the potentials of certain design approaches for well being the existing environments such as vernacular structures heritage buildings with specific advantages for well being changes in well being requirements interior environments with different functions such as schools and home environments and the intersections of interior design with other design disciplines this book is ideally designed for architects interior designers planners engineers administrators policymakers researchers academicians and students
