language contact phenomena in mesoamerica and adjacent regions present an exciting field for research that has
the potential to significantly contribute to our understanding of language contact and the role that it plays in
language change this volume presents and analyzes fresh empirical data from living and or extinct mesoamerican
languages from the mayan uto aztecan totonac tepehuan and otomanguen groups neighboring non
mesoamerican languages apachean arawakan andean languages as well as spanish language contact effects in
these diverse languages and language groups are typically analyzed by different subfields of linguistics that do not
necessarily interact with one another it is hoped that this volume which contains works from different scholarly
traditions that represent a variety of approaches to the study of language contact will contribute to the lessening of
this compartmentalization the volume is relevant to researchers of language contact and contact induced change

this study investigates the distribution of linguistic and specifically structural diversity in northeast asia nea defined
as the region north of the yellow river and east of the yenisei in particular it analyzes what is called the grammar of
questions gq i e those aspects of any given language that are specialized for asking questions or regularly combine
with these the bulk of the study is a bottom up description and comparison of gqs in the languages of nea the
addition of the phrase and beyond to the title of this study serves two purposes first languages such as turkish and
chuvash are included despite the fact that they are spoken outside of nea since they have ties to or even originated
in the region second despite its focus on one area the typology is intended to be applicable to other languages as
well therefore it makes extensive use of data from languages outside of nea the restriction to one category is
necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution
and historical accuracy than is usually the case in linguistic typology the discussion mentions over 450 languages
and dialects from nea and beyond and gives about 900 glossed examples the aim is to achieve both a cross
linguistically plausible typology and a maximal resolution of the linguistic diversity of northeast asia
