nicolai hartmann s possibility and actuality is the second volume of a four part investigation of ontology it deals with such questions as how do we know that something is really possible is the possible only the

actual is the actual only the possible what is the difference between ideal and real possibility this groundbreaking work of modal analysis describes the logical relations between possibility actuality and necessity and it provides insight into the relations between modes of knowledge and modes of being hartmann reviews the history of philosophical concepts of possibility and necessity from ancient megarian philosophy to aristotle to medieval scholasticism to leibniz kant and hegel he explains the importance of modal analysis as a basic investigative tool and he proposes an approach to understanding the nature of human existence that unifies the fields of ontology modal logic metaphysics and epistemology this brilliant and fascinating work is relevant to many topics of debate in contemporary philosophy including the ontology of possible worlds the metaphysics of modality the logic of counterfactual conditionals and modal epistemology it illuminates the nature of real ideal logical and epistemic possibility

arne grøn s reading of søren kierkegaard s authorship revolves around existential challenges of human identity the 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of kierkegaard s text with a constant focus on issues in contemporary philosophy contrary to many approaches to kierkegaard s authorship grøn does not read kierkegaard in opposition to hegel the work of the danish thinker is read as a critical development of hegelian phenomenology with particular attention to existential aspects of human experience anxiety and despair are the primary existential phenomena that kierkegaard examines throughout his authorship and grøn uses these negative phenomena to argue for the basically ethical aim of kierkegaard s work in grøn s reading kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and god this book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in kierkegaard but also in human identity

for more than forty years jacques derrida has attempted to unsettle and disturb the presumptions underlying many of our most fundamental philosophical political and ethical conventions in the philosophy of derrida mark dooley examines derrida s large body of work to provide an overview of his core philosophical ideas and a balanced appraisal of their lasting impact one of the author s primary aims is to make accessible derrida s writings by discussing them in a vernacular that renders them less opaque and nebulous derrida s unusual writing style which mixes literary and philosophical vocabularies is shown to

have hindered their interpretation and translation dooley situates derrida squarely in the tradition of historicist hermeneutic and linguistic thought and derrida's objectives and those of deconstruction are rendered considerably more convincing while derrida's works are ostensibly diverse dooley reveals an underlying cohesion to his writings from his early work on husserl hegel and de saussure to his most recent writings on justice hospitality and cosmopolitanism derrida is shown to have been grappling with the vexed question of national cultural and personal identity and asking to what extent the notion of a pure identity has any real efficacy viewed from this perspective derrida appears less as a wanton iconoclast for whom deconstruction equals destruction but as a sincere and sensitive writer who encourages us to shed light on our historical constructions so as to reveal that there is much about ourselves that we do not know

to claim that works of love is an important philosophical essay is to assume hazardous burden of proof the book's title is an allusion to the bible's injunction that we should love our neighbor as we love ourselves a far cry for instance from diotoma's ladder of erotic desire up which we climb from the love of bodies until we catch a vision of that single sea of beauty beauty itself plato symposium this contrast given that some of some of our neighbors may not be particularly likable or one may even be a determined enemy suggests immediately to some that a book with such an obviously religious title must be excessively moralistic and at best full of sermon helps for the harried clergy or at worst laden with rules for the unlearned laity a casual perusal of a few paragraphs however shows these put down views of the book to be unfounded
