i am well educated possessing numerous post graduate and other degrees certificates and diplomas i first achieved my bachelor of arts in 1989 with then majoring in sociology and education i studied other subjects too including psychology and philosophy in all honesty i did not do well at sociology often struggling with

concepts until i did several at post graduate level during my studies i was amazed at the number of theories students were forced to learn and know and how they had been arrived at often the methods were very questionable as a result my book came about i wanted other students to realize what i had discovered and observed and felt my book also contributed to the sociological debate to what society really is and all about its creators it is also ideally for someone who wants an educational look at my perspective on sociology it is a simple introduction to the inside of how society is run it does not go into detail any other sociological viewpoint rather just adds to the many that already exist and hopefully gives the reader pause on how one can create their own reality in society as for me i am still learning and researching not just about sociology but all sorts of things
