provides a useful reference source on system structure and control covers linear systems nonlinear systems robust control implicit system chaotic systems singular and time varying systems

this is the first comprehensive review of mrna stability and its implications for regulation of gene expression written by experts in the field control of messenger rna stability serves both as a reference for specialists in regulation of mrna stability and as a general introduction for a broader community of scientists provides perspectives from both prokaryotic and eukaryotic systems offers a timely comprehensive review of mrna degradation its regulation and its significance in the control of gene expression discusses the mechanisms rna structural determinants and cellular factors that control mrna degradation evaluates experimental procedures for studying mrna degradation

this volume is a comprehensive guide to the methodologies used in the study of structural domains of cell nuclei the text covers chromatin the karyoskeleton the soluble domain and the nucleolus it details methods that are used to isolate components from these domains and techniques used to assemble and disassemble nuclear elements there is also coverage of three dimensional mapping and localization of nuclear processes key features provides a practical laboratory guide for studying cell nuclei includes comprehensive and easy to follow protocols

traditionally statistics and music are not generally associated with each other however intelligent music software computer digitization and other advanced techniques and technologies have precipitated the need for standard statistical models to answer basic musicological questions statistics in musicology presents an unprecedented intr

an overview of human iron metabolism this book reviews the metabolic importance of iron in evolution the physiology and biochemistry of internal iron exchange iron absorption and iron storage the molecular regulation of cellular iron homeostasis and aspects of iron and disease

presents a unified treatment of the principles methods and issues of program translation

the striking functional versatility of rna is attributable to its remarkable capacity for conformational change current models of rna synthesis its maturation translation and degradation are all based on specific structures and there is growing appreciation of the functional importance of interactions between rna and rna binding proteins this work identifies the major intellectual and technical advances in understanding the part played by structure in how rna works it encompasses the experimental approaches used to define rna structure and its influence on rna functions such as transcription termination catalysis recoding and translational control investigators with these interests and students of molecular biology should find this volume a provocative survey of a rapidly advancing field and a valuable complement to the monograph the rna world

contains a selection of papers that were presented at the fifth international conference on computational structures technology and the second international conference on engineering computational technology which were held in leuven belgium from 6 8 september 2000

luminescent materials with advanced performance are in the research hot spot with the recent technical developments of the display lighting and fluorescence labeling rare earth doped luminescent materials have been the focus of the research community owing to their wide applications in display devices temperature sensors solar cells biomedical fields optoelectronics etc this book covers the broad aspects of organic and inorganic materials based phosphors the purpose of this book is to provide an up to date account of the present status and advancement of various techniques of synthesis of luminescent materials and their advanced applications in different areas this book will cover all the experimental and theoretical approaches related to the rare earth doped luminescent materials it also contains all the necessary information about the rare earth doped luminescent materials that were used in the past few years in a nutshell this book provides a unique platform to the newcomers

who are planning to do research on rare earthdoped luminescent materials as well as the researchers who are well established in this field

a study investigated whether adult anglophone readers of french could be taught to use the organizational patterns top level structures or tlss in expository text and whether they could then use this knowledge the structure strategy to facilitate reading comprehension as measured quantitatively through immediate free recall subjects were 43 university students of high intermediate level french proficiency divided into experimental n 21 and control n 22 groups the experimental group received training in the use of five tlss description sequence causation problem solution and comparison training concentrated on use of the tlss and their corresponding signal words as strategy for promoting recall all subjects were pre and posttested for reading comprehension and recall subjects also completed rating scales to estimate text difficulty memorability affect interest background knowledge clarity of argument organization recommendations content and discussion of content results indicate that text topic was a significant factor in recall suggesting that effects of training in structure strategy cannot be predicted across topics more proficient readers appeared to have the structure strategy already and those trained in it had improved recall structure strategy is teachable reading time was not significantly related to recall and longer passages seemed to offer no disadvantages mse
