this book highlights the diverse methods needed to study a complex media environment and the nuance and richness of the

understanding gained by doing so by offering examples of political communication research considering multiple platforms simultaneously political communication research that considers multiple media platforms is difficult and expensive to perform and therefore relatively rare yet studying media platforms in isolation ignores the realities of the varied and complicated contemporary media experience where most individuals consume information from multiple media outlets media platforms from traditional outlets such as newspapers and television to newer online platforms such as social media have proliferated in recent years this makes the media environment itself more complex as classic understandings of how the media function give way to a growing recognition of the hybrid media system where divisions between content and producers are opaque and where information is gleaned from increasingly diverse and numerous sources studying political communication across platforms allows better understanding of which types of experiences and effects are universal and which are specific to particular platforms this book was originally published as a special issue of political communication

business processes and information systems evolve constantly and affect each other in non trivial ways aligning security requirements between both is a challenging task this work presents an automated approach to extract access control requirements from business processes with the purpose of transforming them into a access permissions for role based access control and b architectural data flow constraints to identify violations of access control in enterprise application architectures

this collection argues that being aware of and reflecting on language form and language use is a powerful tool not only in language learning but also in wider society it adopts an interdisciplinary stance one chapter argues the need for language awareness in business contexts while another examines the role of critical cultural awareness and language awareness in education as bildung others report on research studies in language classrooms and in teacher education language awareness is interrogated from a range of perspectives such as peer interaction teaching young learners learner strategies and strategies for writing online reading and oral fluency training the scope is global including contributions from canada germany iran japan spain and the uk and covers bilingual as well as multilingual contexts the book will be of interest to language teachers language teacher educators other language professionals and generally to the language aware this book was originally published as a special issue of language awareness
