it is a pleasure to be asked to write the foreword to this interesting new book when  
 professor bedrikovetsky first accepted my invitation to spend an extended sabbatical  
 period in the department of mineral resources engineering at imperial college of science  
 technology and medicine i hoped it would be a period of fruitful collaboration this book a  
 short course and a variety of technical papers are tangible evidence of a successful stay in  
 the uk i am also pleased that professor bedrikovetsky acted on my suggestion to publish  
 this book with kluwer as part of the petroleum publications for which i am series editor the  
 book derives much of its origin from the unpublished doctor of science thesis which  
 professor bedrikovetsky prepared in russian while at the gubkin institute the original dsc

contained a number of discrete publications unified by an analytical mathematics approach to fluid flow in petroleum reservoirs during his sabbatical stay at imperial college professor bedrikovetsky has refined and extended many of the chapters and has discussed each one with internationally recognised experts in the field he received great encouragement and editorial advice from dr gren rowan who pioneered analytical methods in reservoir modelling at bp for many years
