abstract networked environments such as the internet provide a new platform for communication and information access in this thesis we address the question of how to articulate and enforce boundaries of control on top of this

platform while enabling collaboration and sharing in a peer to peer environment we develop the concepts and technologies for a new internet service layer called firm that enables structured rights relationship management using a prototpye implementation rmanage we show how firm makes it possible to unify rights relationship management from a user centered perspective and to support full end to end integration of shared control state in network services and users client applications we present a network centric architecture for managing control information which generalizes previous client server based models to a peer to peer environment principles and concepts from contract law are used to identify a generic way of representing the shared structure of different kinds of relationships
