acknowledged this book provides a major reassessment of Keats's intellectual life by considering his engagement with a formidable body of eighteenth century thought from the work of Voltaire, Robertson, and Gibbon to Hutcheson, Hume, and Smith. The book re-examines some of Keats's most important poems, including 'The Eve of St Agnes', 'Hyperion', 'Lamia', and 'Ode to Psyche', in the light of a range of Enlightenment ideas and contexts from literary history and cultural progress to anthropology, political economy, and moral philosophy. By demonstrating that the language and ideas of the Enlightenment played a key role in establishing his poetic agenda, Keats's poetry is shown to be less the expression of an intuitive young genius than the product of the cultural and intellectual contexts of his time.
