this is an introduction to the basic tools of mathematics needed to understand the relation between knot theory and quantum gravity the book begins with a rapid course on manifolds and differential forms emphasizing how these provide a proper language for formulating maxwell s equations on arbitrary spacetimes the authors then introduce vector bundles connections and curvature in order to generalize

maxwell theory to the yang mills equations the relation of gauge theory to the newly discovered knot invariants such as the jones polynomial is sketched riemannian geometry is then introduced in order to describe einstein s equations of general relativity and show how an attempt to quantize gravity leads to interesting applications of knot theory

the 54 papers discuss many aspects of contemporary theoretical and mathematical physics among them quantum deformations and noncommutative geometry quantum mechanics quantum and topological field theory solvable and quasi solvable models modern gravitation theory and geometrical methods in phy

the closed orbits of three dimensional flows form knots and links this book develops the tools template theory and symbolic dynamics needed for studying knotted orbits this theory is applied to the problems of understanding local and global bifurcations as well as the embedding data of orbits in morse smale smale and integrable hamiltonian flows the necessary background theory is sketched however some familiarity with low dimensional topology and differential equations is assumed

this novel is a precious gem based on true events you will delight as sunshine takes you back through the memories of her life with fields the untimely death of fields brings their relationship into another dimension field notes is an insightful fictional memoir and compelling novel chronicling a woman s triumph over a lifetime of living sunshine takes you back to a time she and fields shared memorable moments together after he is gone she takes him into the future sunshine s strong narrative personality has a deep insight into the human condition and gives to you people who are dimensional and real sunshine looks at the world through a very original eye and she is clear about her views she is not equivocal and not self doubting which makes her an appealing character in this day and age of too much fretful self examination she makes sense of her world and does not much quarrel with fate she is skillful as she weaves the characters and the events of their lives into a tapestry of living a life in which there is philosophizing and the revealing of life s purpose
