explains the organisational and legislative changes that have occurred in social work and probation across the uk in the past 10 years

this book provides a theoretically informed guide to the practice of working with offenders in different settings and for different

purposes it deals with topics such as offender rehabilitation case management worker offender relationships working with difficult clients and situations collaboration addressing complex needs and processes of integration the chapters are structured around a dual focus of workers and their environments on the one hand and the nature of the offenders with whom they work on the other the condition and situation of workers is thus considered in the context of the condition and situation of offenders and the relationship between the two

this book provides a theoretically informed guide to the practice of working with offenders in different settings and for different purposes it deals with topics such as offender rehabilitation case management worker offender relationships working with difficult clients and situations collaboration addressing complex needs and processes of integration the book offers a unique perspective on working with offenders in that it incorporates three key elements as part of the latter it provides different types of data including descriptions of programs and selected statistics from each jurisdiction and presents this information in easy to read formats the chapters are structured around a dual focus of workers and their environments on the one hand and the nature of the offenders with whom they work on the other the condition and situation of workers is thus considered in the context of the condition and situation of offenders and the relationship between the two the book is intended to be relevant and familiar to those already working in the field as well as to introduce contemporary principles and practices to those wishing to do so in the future each chapter concludes with two key features the first further reading is oriented toward concepts and the why questions of practice the second key resources alerts readers to appropriate manuals and handbooks and the how questions of practice this includes reference to evidence based examples of good practice and specific intervention models

many people argue that offending behaviour is one of the most problematic issues in our communities today an offender's decision to resort to crime affects people and society on a day to day basis and brings significant emotional physical and financial costs to bear the practitioner's job in the probation service and youth offending service is to try and halt offending behaviour and to protect the public from further crime through pre sentence report recommendations the implementation of appropriate rehabilitation programmes and more reoffending is aimed at readers beginning their careers of working with offenders in the probation service and youth offending service other professionals such as the police service homelessness services and healthcare services will also find valuable and pertinent information covered as working practitioner jonathan hussey explores some of the most powerful methods in addressing offending behaviour today reoffending examines how offenders enter the united kingdom's criminal justice system and the working relationship between the offender and the practitioner it goes on to cover specifics such as working with individuals who misuse substances domestic abuse violent offenders working with sex offenders and working with offenders with

emotional problems the book includes tips focused exercises and case studies that the author and many other professionals have found to be effective in daily practice shedding some much needed light on the cloud of mystery that surrounds working with offending behaviour more book details can be found on the bennion kearny publisher website

when it was published twenty years ago rethinking what works with offenders made a major contribution to criminological knowledge on why people stopped offending and the impact the probation service had on the desistance process unlike other studies that had relied on official conviction data it was the first to make use of self reported data including interviews with men and women on probation and their supervising probation officers it reconceptualised probation outcomes in terms of degrees of success rather than as successful or unsuccessful and offered important policy implications of these conclusions the twentieth anniversary edition contains the original text along with a new foreword by shadd maruna and fergus mcneill locating the book historically and assessing its continued importance to criminology it also includes a new chapter by the author reporting on the key findings of the follow up interviews in 2004 and 2010 12 reflecting on key developments in the field and developing a theory of assisted desistance furthermore it features four new commentaries from mark halsey isabelle f dufour martine herzog evans and josé cid reflecting on the importance and legacy of the book this book presents an important and challenging range of findings on what works in probation and with offenders and remains essential reading for anybody professionally concerned with the present and future of probation

what else works has developed out of a growing awareness amongst practitioners that centralized notions of what works and one size fits all approaches to work with offenders and other groups is inevitably limited in its scope and effectiveness the book seeks to dispel the view of probation service users as offenders and socially excluded people as problems to be managed and treated and instead considers more creative alternatives to reduce both re offending and social exclusion these include working separately with women black and minority ethnic groups local community focussed projects in education and nature and conservation programmes the reader is encouraged to think about past and current policy practice and the relationship between practitioners and offenders or other socially excluded people questions are raised as to whether and how practice could be different and contributors explore the theme of creative and change focussed practice or focus on a particular approach to a practice this book will appeal to students on criminal justice criminology and social work courses professionals operating in these fields as well as the wider audience of professionals and academics who may engage with these service users from a range of policy and practice perspectives

cognitive self change the consensus amongst the leading researchers in the offender treatment area is that the comprehensive and sophisticated clinical methods the authors have derived for offender treatment are unsurpassed indeed they have formed the basis for what is known as the core correctional practices for reducing anti social behavior paul gendreau professor emeritus university of new brunswick bush and colleagues phenomenologically based approach to offender rehabilitation is based explicitly on the stories they have collected from prisoners and probationers and is a welcome contribution to an academic literature that too often obfuscates the actual work involved in delivering help to the hardest to reach in the criminal justice system shadd maruna ph d dean of the rutgers school of criminal justice cognitive self change presents a practical guide to rehabilitation based on understanding the way individual offenders experience themselves and the world around them at the moment they offend de incentivizing criminal behavior and replacing it with self empowered change are the keys to upending the traditionally antagonistic relationship between criminals and those meant to help them change the authors with their experience of working with offenders and implementing rehabilitation programs have drawn together clinical and academic perspectives on the treatment of high risk offenders analyzing current approaches to treatment and the problems encountered in their application cognitive self change rejects the traditional dichotomy of control versus treatment devising instead a strategy that integrates both focusing on high risk and hard core offenders not just those that are ready to change they discuss why offenders offend why they are seldom motivated to change and why they often fail to engage in treatment this leads to a strategy of communication that teaches offenders a set of skills they can use to change themselves and that motivates them to do so

a useful and informative book i would recommend it to students wanting a good introduction to the current issues in criminal justice and probation vista perspectives on probation the three chapters on treatment in practice are all excellent the treatment of sex offenders mentally disordered offenders and the treatment of drug misuse are all described within the social context of public concern ian gives a good overview of the sex offenders treatment program as operated in prisons and finkelhors model which is typically used by probation in working with offenders simon bass caring magazine treatment and rehabilitation have been central to the development of criminal justice policy and have played an important role in the development of criminology in recent years punishment and retribution have attracted more attention than rehabilitation but there has been a resurgence of interest in treatment and rehabilitation with indications that some things do work and an emphasis on evidence based policy making it is also the belief of many that a penal policy without an adequate treatment strategy is unjust and a denial of human rights in this book iain crow provides an accessible overview of the concepts of treatment and rehabilitation adopting a deliberately broad definition and considers the historical basis of treatment and its place within the penal system and british criminology the collapse of the rehabilitative ideal is examined along with what followed it and the development of the more recent what works movement the

basis for evaluating what works is also subjected to critical examination in the second part the book looks at the part that particular agencies such as the probation service prison and non statutory organisations have played in the treatment of offenders in part three the issues raised by treatment and rehabilitation are illustrated with reference to three groups of offenders sexual offenders drug misusers and mentally disordered offenders the treatment and rehabilitation of offenders will be essential reading for students of criminology and criminal justice at both undergraduate and post graduate levels

As recognized, adventure as capably as experience virtually lesson, amusement, as well as understanding can be gotten by just checking out a ebook **Geese Theatre Handbook Drama With Offenders And People At Risk** after that it is not directly done, you could consent even more roughly speaking this life, roughly the world. We meet the expense of you this proper as with ease as easy showing off to acquire those all. We have enough money Geese Theatre Handbook Drama With Offenders And People At Risk and numerous books collections from fictions to scientific research in any way. along with them is this Geese Theatre Handbook Drama With Offenders And People At Risk that can be your partner.
