patients often are asked to fill out questionnaires before or after going to the doctor's office or hospital. What is the point of these questionnaires? Why do the questions often seem irrelevant? Does it matter if patients fill them out or ignore them? This book addresses these questions while also providing historical context about how these questionnaires became so popular. These questionnaires, which philosopher Leah M. McClimans calls patient-centered measures, have a fascinating history that combines the contemporary emphasis in medical ethics on patient-centered care with the contemporary preoccupation with evidence-based medicine. The idea that medical decisions should be based on empirical evidence. Patient-centered measures sit between these two concerns and thus serve as an excellent example of a medical technology for the twenty-first century.

The Indian state till recently denied information about its functioning and decision-making to its citizens, ironically using laws made during the colonial period. Apart from being an anomaly in a democratic set-up, it created an adverse impact on the quality of governance, accountability, and transparency. It was only in 2005, after a prolonged freedom of information movement, that this situation was finally rectified. The government enacted the landmark Right to Information Act, 2005, and gave to all its citizens the right to access information held by or under the control of public authorities. This handbook is meant to serve as a practical guide to the implementation of the act. The book begins by locating the act in the context of a global movement for freedom of information (FOI) and discusses the efforts made by international bodies for adoption of FOI. It also presents a detailed comparative study of FOI in five countries: the US, the UK, Canada, South Africa, and India. In subsequent chapters, the book, adopting a step-by-step approach, discusses the provisions of the Right to Information Act, how citizens should make use of the right to information, the comprehensive guidelines for public authorities and their obligations under the act, which includes the relevant Central Information Commission decisions, the role of the public information officers (PIOs) who are to be appointed

as per the provisions in the act by all public authorities the exemptions allowed under the act and finally the appellate authorities to whom a citizen can appeal in case of unsatisfactory response by the pio
