this book uses a revised version of kingdon s multiple streams framework to examine health financing reforms in china hong kong taiwan and the republic of korea rok as well as long term care insurance ltci reforms in japan and singapore it shows that the explanatory power of the multiple streams framework can be strengthened through enriching the concepts of policy entrepreneurs ideas and windows of opportunity in the original framework as well as bringing the theoretical lens of historical institutionalism into the framework

this informative volume synthesizes the literatures on health economics risk management and health services into a concise guide to the financial and social basics of health insurance with an eye to its wide scale upgrade its scope takes in concepts of health capital strengths and limitations of insurance models the effectiveness of coverage and services and the roles of healthcare providers and government agencies in the equation coverage surveys the current state of group and public policies most notably the effects of the affordable care act on insurers and consumers and the current interest in universal coverage and single payer plans throughout the author provides systemic reasons to explain why today s health insurance fails so many consumers concluding with reality based recommendations for making insurance more valuable to both today s market and consumer well being included among the topics defining health insurance and healthcare finance consuming and investing in health the scope of health insurance and its constraints matching health insurance supply and demand the role of government in health insurance ongoing challenges and the future of health insurance bringing a needed degree of objectivity to often highly subjective material what is health insurance good for is a call to reform to be read by health insurance researchers including risk management insurance and health services research practitioners and policymakers

the theory of social health insurance develops the theory of social health insurance also known as public health insurance while a good deal is known about the demand and supply of private insurance the theoretical basis of social health insurance is much more fragile the theory of social health insurance examines questions including why does social health insurance exist and even dominate private health insurance in most developed countries what are the objectives and constraints of social health insurance managers what is the likely outcome or performance of social health insurance the theory of social health insurance reviews the conventional theory of demand for insurance and health insurance the supply of health insurance in general and social health insurance in particular the properties of the optimal health insurance contract and whether there are factors limiting the growth of social health insurance

this volume presents findings of a world bank review of the existing and potential role of private voluntary health insurance in low and middle income countries and is the third volume in a series of reviews of health care financing also this volume is about managing risk not the risk of national or man made disasters but the risk of illness the developing world is plagued by many of the historical scourges of poverty infectious disease disability and premature death as countries pass through demographic and epidemiological transition they face a new wave of health challenges from chronic diseases and accidents in this respect illness has both a predictable and an unpredictable dimension contributors to this volume emphasize that the public sector has an important role to play in the health sector but they demonstrate that the private sector also plays a role in a context in which private spending and delivery of health services often composes 80 percent of total health expenditure managing risks in the private sector begins at the household level private voluntary health insurance is merely an extension of such nongovernmental ways to deal with the risk of illness and its impoverishing effects in low and middle income countries the authors examine frameworks for analyzing health financing and health insurance they conclude that most studies are hampered by lack of data on the impact of private voluntary health

insurance on broad social goals such as financial protection they find no overall consensus on the impact of voluntary health insurance on public health activities or on the quality innovation and efficiency of personal health services

financial markets actors institutions and technologies are increasingly determining which kinds of services and welfare are available how these are narrated and what comes to represent the common sense in the policy world and in everyday life this element problematises the rationale and operation of one such financial technology private health insurance and the industry it inhabits it offers a cross disciplinary overview of the various drivers of these markets in middle income countries and their appeal for development institutions and for governments using a range of illustrative case examples and drawing on critical scholarship it considers how new markets are pursued and how states are entangled with market development it reflects on how the private health insurance sector in turn is shaping and segmenting health systems and also our ideas about rights fairness and responsibility

this book discusses how the current health insurance market structure affects the two policy goals of expanding health insurance coverage and containing health care costs concerns about concentration in health insurance markets are linked to wider concerns about the cost quality and availability of health care the market structure of the health insurance and hospital industries may have contributed to rising health care costs and deteriorating access to affordable health insurance and health care many features of the health insurance market and the ways it links to other parts of the health care system can hinder competition lead to concentrated markets and produce inefficient outcomes
