this book offers significant managerial and economic knowledge on hospitals and will serve as a valuable tool for explaining complicated managerial and economical problems and for facilitating decision making processes it bridges management and economic sciences two complementary sciences that feed the process of making rational decisions with particular reference to the education the main aim of this book is to provide students of relevant schools and departments with the knowledge managerial and economic that will enable them to deal both efficiently and effectively with the real problems arising in a health care organization such as a hospital in particular by equipping students with appropriate managerial and economic knowledge the aim is to give them a clear understanding of how to deal with the diverse and complex problems of hospitals while at the same time helping them to develop strategic approaches that will make hospitals more efficient and sustainable

first published in 1994 this title was the best selling iea publication of the 1990s it applies the ideas of chaos theory more usually found in the natural sciences to economic and social systems with some profound implications for the management of business and the economy the authors suggest that a chaotic world is more complex than can be captured by the linear equations generally used by economic modellers and the assumptions of neo classical economics and in some ways bears a striking resemblance to the views taken by the austrian school this title provides a concise and straightforward introduction to the application of chaos theory to the social sciences which as its authors say provides a new and exciting departure point for the study of organisations and economies

drylands are a sizeable part of the world's potentially arable land they vary from the hyper arid regions of the classic deserts of africa and asia to the more common semi arid and sub humid areas that support extensive agricultural systems dependent on rainfall or irrigation following their successful and innovative work the economics of dryland management the editors have assembled twenty case studies from nine countries in the continents of africa asia north america and australia they help to explore more fully the costs of land degradation and illustrate the economics of reclamation rehabilitation and prevention the cases in this book present a rich varied and readable survey of a wide range of drylands and their resources originally published

in 19990
