conducting online research on amazon mechanical turk and beyond written by leib litman and jonathan robinson provides both students and experienced researchers with essential information about the online platforms most often used for social science research this insightful and accessible text answers common questions like how do i maintain data quality in online studies what is the best way to recruit hard to reach samples and how can researchers navigate the ethical issues that are unique to online research drawing on their experiences as the founders of clouresearch formerly turkprime the authors provide information that guides new users planning their first online studies and engages even the most experienced researchers with detailed discussions about the challenges of online research the book begins with an overview of amazon s mechanical turk and its rapid rise within academic research then the authors describe how to set up an mturk study with screenshots that walk readers through the steps of creating an account designing a study collecting data and using third party applications to enhance mturk s functionality later chapters provide readers with a detailed understanding of the mturk environment and use data from hundreds of thousands of participants and tens of millions of completed tasks to dive into issues like participant demographics sources of sampling bias and the generalizability of findings from mturk finally the book explores the benefits of using other online platforms as a complement to mturk and the ethical issues that are unique to conducting research with online participant platforms

throughout the book the authors share hands on advice and best practices such as those for conducting longitudinal studies or carrying out complex studies altogether the mix of data insight and advice make this book an essential resource for researchers who want to understand the online environment and the most effective ways to conduct research online

extending law beyond the human the book probes the conceptual openings methodological challenges and ethical conundrums of law in a time of deep socio ecological disturbances and transitions how do we learn and practice law across epistemic and ontological difference what sort of methodologies do we need in what sense does conjuring other than human beings as sentient cognitive and social agents rather than mere recipients of state sanctioned rights transform what we mean by law and rights of nature legal institutions exclusively focused on human perspectives seem insufficiently capable of addressing current socio ecological challenges in latin america and beyond in response this book strives to integrate other than human beings within legal thinking and decision making protocols weaving together various fields of knowledge and world making practices that include but are not limited to indigenous legal traditions earth law and multispecies ethnography law humans and plants focuses on the entanglement of law ecology and indigenous cosmologies in southern colombia in so doing it articulates a general postanthropocentric legal theory which is proposed a tool to address socioecological challenges such as climate change and bio cultural loss this book will be of interest to scholars and students in the disciplines of environmental law earth law and ecological law legal theory and critical legal studies as well as others working in the in the fields of indigenous studies environmental humanities legal anthropology and sustainability and climate change justice

the amazon is a giant piece of amphibian land which is the result of complex geological and evolutionary processes the number of living beings in such a land is difficult to estimate the interactions between these organ isms and the environment are fascinating but barely understood these features lured us to the amazon in 1981 however soon after we realized that the dimensions of these interactions were overwhelming this book is designed to review aspects of the physiology and biochemistry of fishes of the amazon the description of the pulsative nature of the environment and the distinct features of the ichthyofauna of the amazon were central to the main goal nevertheless any complete view is limited by the magnitude of the intraspecific variability coupled with the complex fluctuations of the environment thus we have placed an emphasis on respiratory physiology and biochemistry the reference list was made as complete as possible particularly regarding special publications not readily available we hope that this book is useful for comparative physiologists tropical biologists and the people interested in interactions between organ isms and their environment we are grateful to many people who contributed to the making of this book our initial ideas were influenced by drs arno schwantes maria lufza schwantes jose tundisi anna emflia vazzoler and naercio menezes
