official organ of the book trade of the united kingdom

the greatest challenge humanity faces in the 21st century is the climate crisis a successful green transition towards a sustainable economy requires various policy initiatives including promoting innovation financing and tax incentives for selected activities cheap credit and subsidies to achieve these aims a massive redistribution of capital will be necessary requiring cooperation between public and private sectors the states and civil society this book introduces the idea of a sustainable development convention a convention is a form of social production and shared knowledge that establishes collective reality the sustainable development convention is proposed in opposition to the neoliberal convention according to which pure market coordination is superior to state coordination

the sustainable development convention intends to effect a radical change in both the mission and actions of the state developing new economic policy tools and institutions focusing on the green transition in particular the transition calls for a complete reordering of financial systems and capital flows making the actions of development banks ever more critical development banks have been essential institutions in promoting public policies worldwide their credit and other forms of finance and cooperation have been central tools in catching up processes for developing and emerging economies in times of structural change such as the green transition development banks are required to play a central role this book marks a significant addition to the literature on development banks the green transition the political economy of climate change and economic and monetary policy

in the fast paced world of startups and innovation costs are often treated with passive recognition overshadowed by strategy growth and funding but what if costs were the key to unlocking sustainable value and driving strategic success this groundbreaking book redefines the role of costs within the entrepreneurial venture lifecycles transforming them from passive considerations to active tools for creating capturing and extracting value through a fresh lens it explores the inseparable relationship between costs strategy and investments guiding entrepreneurs founders and innovation ecosystem players through every stage of the journey from ideation to successful exit into a reincarnated life finally it establishes a framework for value driven business models as dynamic three dimensional platforms driven by technology markets and exits where intellectual capital development plays a fundamental role with practical insights grounded primarily in strategic management accounting and entrepreneurial finance and supported by real world applications this book establishes a powerful foundation for integrating costs into value driven business strategies it equips startup founders innovation ecosystem players researchers and academics alike with the tools to rethink costs as a strategic advantage whether you re building a startup thriving in the innovation and knowledge economy or delving into entrepreneurial finance this book will transform the way you think about costs turning them into a powerful catalyst for growth and success
