principles of international energy transition law provides a succinct treatment of the legal principles that govern the transition to green energy
the book positions energy transition in a broader energy context and outlines the interactions between different legal disciplines giving
direction on how they can be reconciled

during the covid 19 pandemic the term vulnerable was applied to individuals and to populations groups and countries in discussions laws and
regulations now it applies to all objects in relation to all kinds of threats however rather than a label for governing people and places the notion
of vulnerability was expected to become an instrument to tackle the root causes of disasters poverty and maldevelopment as well as the
inequalities and injustices they bring whether social political economic or environmental despite this radical dimension vulnerability has
gradually been incorporated into public policies and international recommendations for global risk and disaster management this book is
intended for researchers students managers and decision makers concerned with the management of not only risks and crises but also climate
and environmental change the first part examines the multiple theoretical and conceptual approaches the second explores vulnerability
assessments using examples from the global north and global south and the third discusses tools public policies and actions taken to reduce
vulnerability
