written by pioneering attorneys in the emerging fields of urbanism and green building a legal guide to urban and sustainable development for planners developers and architects offers you practical solutions for legal issues you may face in planning zoning developing and operating such communities find information on legal issues related to urban form legal mechanisms and ways to incorporate good urban design into local land regulation overcoming impediments to sound urban design practice and state and federal issues related to the legal issues of urban design and planning

now in its second edition sustainable materials shows how we can greatly reduce the amount of material demanded and used in manufacturing while still meeting everyone's needs materials transformed from natural resources into the buildings equipment vehicles and goods that underpin our remarkable lifestyle are made with amazing efficiency but our growing demand is not sustainable production of just five materials steel aluminium paper plastics and cement accounts for 55 of industrial emissions and demand for materials will double by 2050 can we continue to live well but use less materials so far people have considered the problem with only one eye open hoping for a magic solution such as carbon capture and storage but with both eyes open we have a whole new set of options rather than making more materials we can use them more wisely with less material keeping them for longer re using their parts and more these options make a huge difference we really could set up our children with a more sustainable life without compromising our own sustainable materials faces up to the impacts of making materials in the 21st century drawing on their experiences working with innovative materials as well as the facts and findings of their research julian allwood and jonathan

cullen provide an evidence based vision of change that will allow us to make our future more sustainable packed with hundreds of colour photos and helpful graphs and diagrams sustainable materials provides a thorough analysis of the problems that we face through wasteful attitudes and the growing demand for materials as well as an evaluation of practical and achievable solutions for the future the first edition of this optimistic and richly informed book was listed as one of bill gate s top reads in 2015 and was also chosen as an outstanding academic title by acrl choice magazine this up to date revised edition is perfect for anyone with an interest in sustainability

during the past 2 decades the grizzly bear *ursus arctos* population in the greater yellowstone ecosystem gye has increased in numbers and expanded in range understanding temporal environmental and spatial variables responsible for this change is useful in evaluating what likely influenced grizzly bear demographics in the gye and where future management efforts might benefit conservation and management we used recent data from radio marked bears to estimate reproduction 1983 2002 and survival 1983 2001 these we combined into models to evaluate demographic vigor  $\lambda_k$  we explored the influence of an array of individual temporal and spatial covariates on demographic vigor abstract first paragraph

defining the scope to the problem of pesticide residues sources of the problems industry case studies of chemical use and residue dissipation monitoring and detection traceback and treating the problem remediation bioremediation and decontamination of residues monitoring and detection contributed poster papers

the aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field the volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science the 28 chapters cover a range of global and local studies illustrations and cases these range from the cochabamba conference in bolivia to climate camps in the uk un summits in rio de janeiro and johannesburg to climate migrants from pacific islands forests in indonesia to dutch energy governance reform indigenous communities in namibia to oil extraction in the niger delta survivalist militias in the usa to maasai tribesmen in kenya rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts

in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability features and benefits of the book explains the most important concepts and theories in environmental politics reviews the core ideas behind crucial debates in environmental politics highlights the key thinkers both classic and contemporary for studying environmental politics provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics each chapter is written by leading international authors in their field this exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers
