hidalgo has made a bold attempt to synthesize a large body of cutting edge work into a readable slender volume this is the future of growth theory financial times what is economic growth and why historically has it occurred in only a few places previous efforts to answer these questions have focused on institutions geography finances and psychology but according to mit's antidisiplinarian céron hidalgo understanding the nature of economic growth demands transcending the social sciences and including the natural sciences of information networks and complexity to understand the growth of economies hidalgo argues we first need to understand the growth of order at first glance the universe seems hostile to order thermodynamics dictates that over time order or information disappears whispers vanish in the wind just like the beauty of swirling cigarette smoke collapses into disorderly clouds but thermodynamics also has loopholes that promote the growth of information in pockets although cities are all pockets where information grows they are not all the same for every silicon valley tokyo and paris there are dozens of places with economies that accomplish little more than pulling rocks out of the ground so why does the us economy outstrip brazil's and brazil's that of chad why did the technology corridor along boston's route 128 languish while silicon valley blossomed in each case the key is how people firms and the networks they form make use of information seen from hidalgo's vantage economies become distributed computers made of networks of people and the problem of economic development becomes the problem of making these computers more powerful by uncovering the mechanisms that enable the growth of information in nature and society why information grows lays bare the origins of physical order and economic growth situated at the nexus of information theory physics sociology and economics this book propounds a new theory of how economies can do not just more things but more interesting things

this collection shows the prospects for evolutionary economics along with its problems both the strengths and limitations of veblen's ideas are clarified specific areas examined include the firm the role and limitations of knowledge and capitalism

in the study it has been seen that the economy of sikkim has the twin characteristics of a

traditional and a modern economy so far as the former is concerned it is mostly shaped and influenced by natural mainly geographical and cultural factors

material progress is coming to an end exhausted by its own success and confronted by the limits of postindustrial capitalism but poised to replace it argues the author is a radical new vision of human progress the transformation of people themselves through advances in neurobiology artificial intelligence and genetic engineering

the exciting experiments of the babar and belle collaborations have now proven violation of cp symmetry in the neutral b system this has renewed strong interest in the physics of cp violation novel experimental techniques and new highly intense neutron sources are now becoming available to further test the related time reversal symmetry they will substantially lower the current limit on the neutron electric dipole moment and hence open up new tests of theoretical concepts beyond the standard model these are strongly required to explain the decisive excess of matter versus antimatter in our universe there is a definite need to communicate these exciting developments to younger scientists and therefore we organized a summer school in october 2000 on cp violation and related topics which was held in prerow a small baltic sea resort these lecture notes were inspired by the vivid interest of the participants and i am grateful to the authors who faced the unexpected and delivered all the material for an up to date introduction to this broad field it is a great pleasure for me to warmly thank the co organizers of the summer school henning schröder thomas mann klaus r schubert and my colleague roland waldi also i would like to express my sincere thanks to the volkswagen stiftung for their financial support of this inspiring summer school

this book is at the cutting edge of the ongoing neo schumpeterian research program that investigates how economic growth and its fluctuation can be understood as the outcome of a historical process of economic evolution much of modern evolutionary economics has relied upon biological analogy especially about natural selection although this is valid and useful evolutionary economists have increasingly begun to build their analytical representations of economic evolution on understandings derived from complex systems science in this book the fact that economic systems are necessarily complex adaptive systems is explored both theoretically and empirically in a range of contexts throughout

there is a primary focus upon the interconnected processes of innovation and entrepreneurship which are the ultimate sources of all economic growth twenty two chapters are provided by renowned experts in the related fields of evolutionary economics and the economics of innovation
