there is an historical element throughout philosophy as edel notes this is always in the context of problems so emphasis will fall on the major objective of reflective analysis of ideas the major objective of edel s analysis in the theory and practice of philosophy is the fundamental interrelatedness of problems of method metaphysics and value each part is an integral whole complete in itself that philosophy has this central role in human practice indicates that it should be neither discarded nor deified this is the explicit premise of the book students are likely to be faced increasingly with a demand for clarification on the fundamental issues of life and value the expectation that philosophy will provide ready made answers to these kinds of questions is as naive as the demand for any panacea but this task cannot be turned over to any other department of human knowledge or any other branch of social activity by placing emphasis on the importance of theory in matters of practice the need for clear and systematic understanding of the world and man within it and on the constant role of reflection in the management of human affairs edel seeks to shed light on the larger questions of philosophy by examining them in a systematic way the result is a great text and tool for students and teachers that deals directly with the fundamental issues of our civilization

skeptics have cast doubt on the idea that scientific theories give us a true picture of an objective world lawrence sklar examines three kinds of skeptical arguments about scientific truth and explores the important role they play within foundational science itself sklar demonstrates that these kinds of philosophical critique are employed within science and reveals the clear difference between how they operate in a scientific context and more abstract philosophical contexts the underlying theme of theory and truth is that science and philosophy are essential to one another sklar advances the claim that one cannot understand the methods of science without a comprehension of philosophy and one cannot fruitfully pursue philosophy of science

without understanding fundamental science as well

this volume presents international perspectives on the application and development of theory and methodology in researching higher education topics discussed include critical race theory the use of communities of practice theory participant ethnography and decolonization using indigenous principles
