health care is everywhere under tremendous pressure with regard to efficiency safety and economic viability to say nothing of having to meet various political agendas and has responded by eagerly adopting techniques that have been useful in other industries such as quality management lean production and high reliability this has on the whole been met with limited success because health care as a non trivial and multifaceted system differs significantly from most traditional industries in order to allow health care systems to perform as expected and required it is necessary to have concepts and methods that are able to cope with this complexity resilience engineering provides that capacity because its focus is on a system's overall ability to sustain required operations under both expected and unexpected conditions rather than on individual features or qualities resilience engineering's unique approach emphasises the usefulness of performance variability and that successes and failures have the same aetiology this book contains contributions from acknowledged international experts in health care organisational studies and patient safety as well as resilience engineering whereas current safety approaches primarily aim to reduce or eliminate the number of things that go wrong resilient health care aims to increase and improve the number of things that go right just as the WHO argues that health is more than the absence of illness so does resilient health care argue that safety is more than the absence of risk and accidents this can be achieved by making use of the concrete experiences of resilience engineering both conceptually ways of thinking and practically ways of acting

how do you come up with the idea to list all the birds in the world including the subspecies and to give all birds English names there is a reason for it my favorite saying whose author is unknown everyone said that's not possible then there was one who did not know that and just did it i am an animal photographer and probably a little bit crazy i've built a complete animal database for mammals and birds over the last decade this facilitates my work in determining and archiving images and assigning keywords especially among the many subspecies with this book i would like to give all birding friends and ornithologists a complete overview in English for this i have given unique English names to all subspecies the naming should not meet any scientific requirements the names are based on translations from the Latin name geographical distribution areas and the names of the discoverers the entries consist of the scientific name the English name the distribution areas and the author i wish you a lot of fun with this book but especially while watching the fascinating birdlife fotolulu
