this book will introduce you to the very popular android wear platform with hands on instructions for building android wear applications you will start with an introduction to the architecture of android followed by an in depth look at the design of android applications and user interfaces using android studio you will see how to create basic and custom notifications for your apps and synchronize data from the wearable device with the handheld mobile device more advanced topics such as intents the gradle build configuration and the implementation of build variants and packaging and deploying from a single project code base are also covered by the end of this book you will have a good understanding of wearable programming and be confident enough to write programs for building android applications that run on android wear

software development mobile android wearable fitness build wearable applications on the android wear and google fit platforms this book covers wearable computing and wearable application development particularly for android wear smartwatches and google fit fitness sensors it provides relevant history background and core concepts of wearable computing and ubiquitous computing as a

foundation for designing developing applications for the android wear and google fit platforms this book is intended for android wearable enthusiasts technologists and software developers gain insight into wearables in the modern consumer ecosystem of a multitude of devices ubiquitous computing cloud computing and intelligent personal assistants learn the android wear and google fit apis and jump start hands on development including setting up an android development environment suitable for android wear and google fit setting up smartwatch and fitness devices for development and debugging writing applications that install and execute on android wear smartwatch devices and applications that run on your handheld android devices and find and connect to fitness sensors and access fitness data and more catch up with the new android 5 0 lollipop android studio and the gradle based build system learn how to write applications for smart watches and fitness sensors on the android google ecosystem sanjay s tome provides a comprehensive and timely treatment of the essential points of current wearable technology and android wearable development techniques the easygoing and comprehensive examples make this book a joy to discover and a delight to peruse highly recommended rudi cilibrasi computer scientist the text provides a rich and immersive overview of the field of wearable computing that is solidified by the impressive set of examples i was simultaneously entertained as well as educated and would highly recommend this book to anyone that is looking to get started with wearables nathan blair software engineer entrepreneur sanjay m mishra began programming in c on various flavors of unix in the early 1990s over the years he has developed diverse software systems spanning web applications and services messaging voip nosql databases as well as mobile and embedded platforms he has worked for companies such as intertrust eyecon technologies callsource nvoc formerly sandcherry inc and the starz entertainment group

beginning android wearables gives you the skills you need to make effective apps for android wear based smartwatches fitness bracelets connected home wearable controllers and google glass delight your users by giving them access to the information they ll need at the tips of their fingers this book is very practical and contains many examples that not only show you how to write code for glass and android wear but also demonstrate how to apply this code in the context of an app

update to the bestseller now features the latest release of the android platform android is a powerful flexible open source platform for mobile devices and its popularity is growing at an unprecedented pace this update to the bestselling first edition dives in to cover the exciting new features of the latest release of the android mobile platform providing in depth coverage of how to build mobile applications using the next major release of the android sdk this invaluable resource takes a hands on approach to discussing android with a series of projects each of which introduces a new feature and highlights techniques and best practices to get the most out of android the android sdk is a powerful flexible open source platform for mobile devices shares helpful techniques and best practices to maximize the capabilities of android explains the possibilities of android through the use of a series of detailed projects demonstrates how to create real world mobile applications for android phones includes coverage of the latest version of android providing concise and compelling examples professional android application development is an updated guide aimed at helping you create mobile applications for mobile devices running the latest version of android

the comprehensive developer guide to the latest android features and capabilities professional android 4th edition shows developers

how to leverage the latest features of android to create robust and compelling mobile apps this hands on approach provides in depth coverage through a series of projects each introducing a new android platform feature and highlighting the techniques and best practices that exploit its utmost functionality the exercises begin simply and gradually build into advanced android development clear concise examples show you how to quickly construct real world mobile applications this book is your guide to smart efficient effective android development learn the best practices that get more out of android understand the anatomy lifecycle and ui metaphor of android apps design for all mobile platforms including tablets utilize both the android framework and google play services

diploma thesis from the year 2011 in the subject computer science miscellaneous grade 2 3 technical university of berlin agententechnologien in betrieblichen anwendungen language english abstract the smartphone market is evolving rapidly irrespective of the well known spread within the business sector in recent years the average users tend to replace their traditional mobile phones pdas and palms with smartphones these devices have become a pervasive part of everyday life dealing with huge amounts of data the mobile device s and application s demand for certain security standards cannot be underestimated in recent studies the individual user s needs in terms of technical features applications etc have not been addressed and analyzed properly to capture the problem in its full extent it is vital to understand the user s expectations besides the usage patterns have to be described especially against the background of security aspects as mentioned before recent analyzes did not specifically ask what the user expects from a smartphone hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect taking into consideration

security aspects an international web based online survey was designed and performed to measure and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a smartphone the main goals were to identify user needs in the context of smartphones to analyze their knowledge and acquisition to security aspects and to get significant data about the user s behaviour the main findings of the survey are that on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone calls writing messages or storing contacts on the other hand they want a smartphone to provide mobile internet access navigation features multimedia aspects a comfortable usability and a good lo

project report from the year 2011 in the subject business economics offline marketing and online marketing grade 1 7 san diego state university marketing department language english abstract htc quickly emerged on the smartphone scene with the remarkable success of the sense one of its first models and broke many industry sales records people were asking who is htc our research indicates that htc s rapid rise to success was because of innovation and technological capabilities even though the htc brand was not widely recognized its smartphones were generating interest in our primary research we discovered that some people owned an htc phone but did not know that htc was the manufacturer obviously brand awareness was relatively low for htc to stay relevant in the hypercompetitive smartphone industry it needs serious revamping of its marketing plan with smartphone market penetration increasing to more than 20 percent in the past five years and reaching 46 8 percent in q3 2011 htc has tremendous opportunities to establish a solid market position after examining the market conditions and current htc performance in the u s our team proposes that htc position itself as a technological leader by targeting consumers ages 18 to 34 this promising segment has potential sales of 2 5 million we analyzed the industry and examined external factors that could impact htc s bottom line this analysis gave us crucial insight into the smartphone market we also analyzed the competitive environment that includes apple motorola and rim blackberry htc which has a positive

reputation on the merits of its technology needs to boldly differentiate itself in the marketplace through market analysis we discovered that htc has a strong market size market potential and distinct target markets we recommend that htc take specific steps through segmenting targeting and positioning to execute its marketing plan we are confident that our plan can increase htc s market share by 2 percent each year by the end of 2012 our marketing objective is to reach a 24 percent market share of the smartphone industry which equals 18 7 million htc customers the plan includes recommendations and precautions at distribution channels so that htc differentiates itself from the other brands we developed a budget for the marketing plan and devised procedures to monitor each effort in order to reach our projected market share increase we are confident that our marketing plan can take htc from an emerging brand to a dominant market leader

adversity comes in all shapes and sizes why do many people and organizations succumb to adverse situations and only a few rise above them in a to b hersh bhardwaj uses the power of storytelling to move from adversity to breakthrough combining the ancient wisdom of 1001 arabian nights and popular psychology the book provides a roadmap to turnaround any situation how does scheherazade the arabian princess survive for 1001 nights by telling captivating stories to shahryar the ruthless king knowing fully well that the earlier queens haven t survived a single night why did she volunteer to spend one night with the king how did she maintain her calm in the face of adversity and most importantly how did she manage to not only survive but also cured the king of his euphoria and lived happily ever after the book answers these and many other questions as it unravels the complex path from a to b
