questions asked in various competitive exams with answers

even though mathematics and physics have been related for centuries and this relation  
appears to be unproblematic there are many questions still open is mathematics really  
necessary for physics or could physics exist without mathematics should we think  
physically and then add the mathematics apt to formalise our physical intuition or should  
we think mathematically and then interpret physically the obtained results do we get  
mathematical objects by abstraction from real objects or vice versa why is mathematics  
effective into physics these are all relevant questions whose answers are necessary to  
fully understand the status of physics particularly of contemporary physics the aim of this  
book is to offer plausible answers to such questions through both historical analyses of  
relevant cases and philosophical analyses of the relations between mathematics and  
physics
