additive manufacturing am processes are gaining more and more attention from many industrial fields mainly because they are revolutionizing the components designs and production lines the complete industrialization of these processes has to be

supported by the full understanding of correlation between am building conditions and the final materials properties another critical aspect is that nowadays only a reduced number of materials processable by am are available on the market it is therefore fundamental to widen the materials portfolio and to study and develop new materials that can take advantage of these unique building processes
