document from the year 2015 in the subject sociology religion language english abstract without the fear of contradicting anyone it can generally be held that academicians worldwide describe karl marx as an atheist this point needs not to be challenged or scrutinised in great depths the reason is that marx s personal mentality or intellectual bending does not profoundly affect the making of marxism and its applications to the real world the first country to embrace scientific socialism along marxist lines came into existence in the form of erstwhile soviet union the soviet union or the union of soviet socialist republics ussr was a country that began taking shape in the year 1917 however marx had died rather long ago in the year 1883 so any attempt to find a direct personalised connection between marx and ussr is nothing but academically irrelevant this irrelevance is further bulged when it is considered that marx was especially interested in the affairs of germany according to marx only well developed capitalist economies were expected to be at the verge of a socialist revolution desai 2004 however when the bolsheviks of a backward capitalist country like russia managed to establish the ussr marx s predictions came under close scrutiny by the contemporary thinkers desai 2004 in the current research work the economic importance of this development is not the main focus area the main focus area is marxism and religion the main point of contention is not what marx thought about religion overwhelming majority of scholars think that marx was a decided atheist however the main point of contention is what marxists should actually do while handling religion religion even in its simplest form has the capability of manifesting as both personalised and socially dispersed phenomena while exploring a possible alternative to capitalism marxist and pro marxist leaders contemplated on various societal issues which included religion and theology as well desai 2004 lobkowicz 1964 so it is a complex yet necessary pursuit to understand how marxism needs religion to be handled if marxism were completely antireligious then most of the world s socialist governments would not have allowed religious freedom at least officially for example even the soviet constitution did never authorise the state to destroy religion or persecute people on religious grounds ginsburgs 1982 this kind of approach cannot be simplified just on the basis of a longing for internationalism

this book offers a critical assessment of some of the most contentious topics in the marxian critique of political economy in the light of

the recent publications of the complete manuscripts and editions of capital in mega covering issues like the incompleteness of marx s critique of political economy the long term trajectories of capitalism the problem of economic crisis and the center periphery dynamics within global capitalism this book offers an original intervention into the current debates of the marxist tradition precisely at a crucial moment for the research of marx s critique of the capitalist economy and recovers the true critical dialectical and open character of marx s social theory

aimed at sixth formers and first year undergraduates this textbook aims to provide an unbiased assessment of the respective merits and demerits of the variety of economic systems that have existed in the 20th century

it is reported that the moment anyone talked to marx about morality he would roar with laughter yet plainly he was fired by outrage and a burning desire for a better world this paradox is the starting point for marxism and morality discussing the positions taken by marx engels and their descendents in relation to certain moral issues steven lukes addresses the questions on which marxist thinkers and actors have taken a number of characteristic stands as well as other questions personal relations and the moral virtues of the individual for example on which marxism falls silent a provocative exploration of the gray area where marxism and morality meet this book argues that marxism makes a number of major moral claims and that its appeal has always been in large part a moral one

in a unique format of intellectual challenge and counter challenge prominent native americans and marxists debate the viability of marxism and the prevalence of ethnocentric bias in politics culture and social theory the authors examine the status of western notions of progress and development in the context of the practical realities faced by american indians in their ongoing struggle for justice and self determination this dialogue offers critical insights into the nature of ecological awareness and dialectics and into the possibility of constructing a social theory that can bridge cultural boundaries
