for fisheries and environmental agencies shedding light on the role of non fin commodities derived from sharks and rays in fisheries and trade to effectively conserve shark and ray resources we must adopt a more holistic understanding of their fisheries and markets historically the focus has primarily centred on regulating the export of shark fins often overlooking traditional and emerging fishing practices and markets related to other elasmobranch products such as meat skin cartilage liver oil and gill plates due to limited examination of non fin commodities we lack clarity on their sources the extent of exploitation and their significance as drivers of elasmobranch utilization the report aims to shift attention towards non fin commodities in shark and ray management by doing so we hope to expand the range of potential interventions that can be employed to achieve sustainable elasmobranch fisheries a critical source of food security nutrition and livelihoods for coastal communities worldwide

the key aim of this book is to explore the global conservation and management of sharks there has been a rapid decline in populations of many shark species while new science has emerged of the critical role they play in marine ecosystems however the authors show that conservation law and policy have been slow to develop with only a small number of iconic species being protected worldwide the increase in fishing impact primarily through shark finning and by catch has led to shark conservation receiving greater international attention in recent years the book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management recent trends are analysed including shark finning bans that have been put in place in several countries the widening number of nations establishing shark sanctuaries and the growth of shark based tourism the efficacy of current listing processes for endangered species and fisheries regulations is also examined tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed contributors include leading authorities from universities and conservation organizations in north america europe and australia a common theme is to emphasise the importance of collaborative governance between various interest groups and the need for inter disciplinary research and management approaches that are necessary to address the decline in sharks

biology of sharks and their relatives is an award winning and groundbreaking exploration of the fundamental elements of the taxonomy systematics physiology and ecology of sharks skates rays and chimera this edition presents current research as well as traditional models to provide future researchers with solid historical foundations in shark research as well as presenting current trends from which to develop new frontiers in their own work traditional areas of study such as age and growth reproduction taxonomy and systematics sensory biology and ecology are updated with contemporary research that incorporates emerging techniques including molecular genetics exploratory techniques in artificial insemination and the rapidly expanding fields of satellite tracking remote sensing accelerometry and imaging with two new editors and 90 contributors from the us uk south africa portugal france canada new zealand australia india palau united arab emirates micronesia sweden argentina indonesia cameroon and the netherlands this third edition is the most global and comprehensive yet it adds six new chapters representing extensive studies of health stress disease and pathology and social structure and continues to explore elasmobranch ecological roles and interactions with their habitats the book concludes with a comprehensive review of conservation policies management and strategies as well as consideration of the potential effects of impending climate change presenting cohesive and integrated coverage of key topics and discussing technological advances used in modern shark research this revised edition offers a well rounded picture for students and researchers

some species and stocks of sharks rays skates and chimaeras termed shark in this review are rapidly depleting due to climate change land based influences and overfishing these pressures

coupled with sharks low reproductive potential slow growth and delayed maturation long reproductive cycles low fecundity and long lifespans place sharks in a risk profile that is more akin to mammals on land than fish in the ocean the development of policy and the delivery of management and conservation measures regulating the use international trade and capture of sharks whether as a targeted species or as bycatch in fisheries is hindered by gaps in basic knowledge a knowledge that is required in order to get a clear sense of their status in real time many countries are establishing or strengthening monitoring across shark value chains to overcome these shortfalls in information this document reviews what shark fisheries data is being collected highlighting the opportunities and constraints in collecting information on sharks in fisheries based on practical experience it includes information from 28 surveys across 19 countries 9 in the mediterranean 5 in africa 3 in asia and 1 in oceania interviews were conducted with data collectors and managers across the entirety of the survey process while data collection variables were documented in order to inform those interested in the collection provision and exchange of shark information on common practices and their commonalities the review identifies standardized information metrics which if collected more generally would strengthen the opportunity for harmonized reporting and cross comparability across surveys in addition and in order to assess the status quo the current data collection requirements of management measures applied to sharks by regional fisheries management organizations rfmos were reviewed including no retention measures finally the review proposes a list of the minimum standard measurements and common life history parameters required to support the assessment of shark stocks in fisheries

the first meeting of the wecafc ospesca crfm cites cfmc working group on shark conservation and management was held in barbados on 17 19 october 2017 the meeting was attended by 30 shark fisheries experts from 15 wecafc member countries and partner agencies the meeting recognized the decline in various shark and ray stocks in the caribbean region as well as the need to conserve the threatened species among them the meeting stressed the importance of harmonizing conservation and management measures with various international and regional conventions for the protection of these often migratory species as well as with measures by regional fisheries management bodies in the atlantic the fisheries experts recommended amongst others that the countries in the region should prohibit the removal of shark fins at sea and require that all sharks be landed with their fins naturally attached through the point of first landing of the sharks the experts recommended the prohibition of targeted fisheries for iconic species such as whale sharks sawfishes and manta rays the experts worked on a regional shark stocks and fisheries status assessment and a regional plan of action for the conservation and management of sharks and rays in the wecafc area

in 2011 the conference on fisheries requested fao to prepare a report on the implementation of the 1999 fao international plan of action for the conservation and management of sharks by fao members and the challenges members faced when implementing the instrument this document provides the requested review and includes information on national plans of action npoas for the conservation and management of sharks national fisheries regulations in general and measures applicable to sharks including research data collection and reporting in addition membership of relevant regional fisheries management organizations rfmos and status of adopting the port state measures agreement are included this review focuses on the 26 top shark fishing countries areas and territories determined as those reporting at least 1 percent of global shark catches during the decade from 2000 to 2009 indonesia india spain taiwan province of china argentina mexico the united states of america pakistan malaysia japan france thailand brazil sri lanka new zealand portugal nigeria iran islamic republic of the united kingdom of great britain and northern ireland the republic of korea canada peru australia yemen senegal and venezuela bolivarian republic of this review also considered shark action

plans and measures from the european union member organization and ten rfmos eighty four 84 percent of the global shark catches reported to fao from 2000 to 2009 was from the 26 top shark fishing countries areas and territories overall global reported annual shark catches during this decade show a significant decline of almost 20 percent from about 900 000 tonnes to about 750 000 tonnes the review shows that 18 of the 26 top shark fishing countries areas and territories have adopted an npoa sharks and that an additional 5 of these countries are in the process of adopting or developing such a plan among the most commonly adopted management measures for sharks are shark fin measures but other regulations have also been implemented such as closed areas and season by catch discard regulations protected species total allowable catches tac and quotas special reporting requirements and others data collection and research on sharks is lacking in many regions overall the reporting of shark catches to fao has improved in the last decade shark catches reported at species level doubled from 14 percent in 1995 to 29 percent in 2010 most of the top shark fishing countries areas and territories have taken steps to combat illegal unreported and unregulated iuu fishing either by signing the fao port state measures agreement psma 46 percent or at least by adopting an npoa iuu or similar plan 23 percent only five 20 percent of the top 26 shark fishing countries areas and territories have not adopted an npoa sharks signed the psma or implemented an npoa iuu nonetheless in quite a few countries the effective implementation of mcs schemes is problematic often because of a lack of human and financial resources all but one of the top shark fishing countries areas and territories are members of at least one rfmo in particular shark measures adopted by tuna bodies are binding in their areas of competence for all their member states that have not objected to the measure in question the array of shark measures adopted by the rfmos may vary from binding recommendations or resolutions to non binding measures as in the case of the commission for the conservation of southern bluefin tuna ccsbt they include shark fin measures catch and gear regulations prohibited species area closures reporting requirements and research programmes this means that in all but one area covered by rfbs there are internationally binding shark measures in place for high seas fisheries publisher s description
