sustain and develop the thirteenth volume from 306090 books investigates the contradictory yet potentially productive tension between our drive to develop and our growing realization that unregulated growth is eroding the natural ecology in which we live sustain and develop asks if it still possible to meet the needs of the present without compromising the ability of future generations to meet needs of their own how can developing countries undergoing rapid urbanization processes be brought actively into the debate how can developed countries with their own postindustrial landscapes and shrinking populations adapt to a redefined global economy sustain and develop provides a forum to investigate the tangle of interwoven issues and relationships that hold potential answers to these questions

with the aim of projecting alternative and sustainable forms of urbanism the book asks what are the key principles of an ecological urbanism how might they be organized and what role might design and planning play in the process while climate change sustainable architecture and green technologies have become increasingly topical issues surrounding the sustainability of the city are much less developed the premise of the book is that an ecological approach is urgently needed both as a remedial device for the contemporary city and an organizing principle for new cities ecological urbanism approaches the city without any one set of instruments and with a worldview that is fluid in scale and disciplinary approach design provides the synthetic key to connect ecology with an urbanism that is not in contradiction with its environment the book brings together design practitioners and theorists economists engineers artists policy makers environmental scientists and public health specialists with the goal of reaching a more robust understanding of ecological urbanism and what it might be in the future contributors include homi bhabha stefano boeri chuck hoberman rem koolhaas sanford kwinter bruno latour nina marie lister moshen mostafavi matthias schuler sissel tolaas charles waldheim
