the devastating thesis of this book is that there is a deadly and irreconcilable opposition between western civilization and christianity and that one of them must destroy the other throughout his more than forty years of teaching and writing says john l mckenzie he felt a vague but strong discomfort a malaise he finally realized that it was a deliberately unrecognized discord between what i was and the word of god which i had so long studied my way of life and my world demanded the maintenance of a number of assumptions which the world of god compelled me to question my way of life and my world did not permit me to ask those questions when the questions grew to an intolerable number this book was the only way to find comfort the comfort which i hope is reached by at last achieving total candor and candid john mckenzie is in this piercing analysis of the confrontation between christianity and a world which has twisted it softened it rationalized it and evaded its basic precepts

the origins of the civilization of angkor reflects the results of a research programme conducted by charles higham over the last twenty years highlighting much entirely new and occasionally surprising information and providing a distinct perspective on cultural change over two millennia the book covers the background of environmental change the adoption of rice farming archaeogenetics the adoption of copper based metallurgy the iron age and the origins of state formation

daily telegraph books of the year if in the year 1411 you had been able to circumnavigate the globe you would have been most impressed by the dazzling civilizations of the orient the forbidden city was under construction in ming beijing in the near east the ottomans were closing in on constantinople by contrast england would have struck you as a miserable backwater ravaged by plague bad sanitation and incessant war the other quarrelsome kingdoms of western europe aragon castile france portugal and scotland would have seemed little better as for fifteenth century north america it was an anarchic wilderness compared with the realms of the aztecs and incas the idea that the west would come to dominate the rest for most of the next half millennium would have struck you as wildly fanciful and yet it happened what was it about the civilization of western europe that allowed it to trump the outwardly superior empires of the orient the answer niall ferguson argues was that the west developed six killer applications that the rest lacked competition science democracy medicine consumerism and the work ethic

the key question today is whether or not the west has lost its monopoly on these six things if so ferguson warns we may be living through the end of western ascendancy civilization takes readers on their own extraordinary journey around the world from the grand canal at nanjing to the topkapi palace in istanbul from machu picchu in the andes to shark island namibia from the proud towers of prague to the secret churches of wenzhou it is the story of sailboats missiles land deeds vaccines blue jeans and chinese bibles it is the defining narrative of modern world history
