In keeping with the spirit of the first edition *Teaching ESL Composition: Purpose, Process, and Practice*, second edition presents pedagogical approaches to the teaching of ESL composition in the framework of current theoretical perspectives on second language writing processes, practices, and writers. The text as a whole moves from general themes to specific pedagogical concerns. A primary goal is to offer a synthesis of theory and practice in a rapidly evolving community of scholars and professionals. The focus is on providing apprentice teachers with practice activities that can be used to develop the complex skills involved in teaching second language writing. Although all topics are firmly grounded in reviews of relevant research, a distinguishing feature of this text is its array of hands-on practical examples, materials, and tasks which are presented in figures and in the main text. The synthesis of theory and research in a form that is accessible to preservice and in-service teachers enables readers to see the relevance of the field's knowledge base to their own present or future classroom settings and student writers. Each chapter includes questions for reflection, pre-reading questions that invite readers to consider their own prior experiences as students and writers, and to anticipate how these insights might inform their own teaching practice. Reflection and review follow-up questions that ask readers to examine and evaluate the theoretical information and practical suggestions provided in the main discussion and application activities. A range of hands-on practical exercises such as evaluating and synthesizing published research, developing lesson plans, designing classroom activities, executing classroom tasks, writing commentary on sample student papers, and assessing student writing. The dual emphasis on theory and practice makes this text appropriate as a primary or supplementary text in courses focusing on second language writing theory as well as practicum courses that emphasize or include second language writing instruction or literacy instruction. More generally new in the second edition: updated research summaries; consider new work that has appeared since publication of the first edition; revised chapter on research and practice in the use of computers in second language writing courses; covers recent developments; streamlined number and type of application activities; focus on hands-on practice exercises and critical analysis of primary research; and revisions throughout reflect the authors' own experiences with the text and reviewers' suggestions for improving the text.
