biochemistry of human cancer

explains biochemistry which students should understand before studying pathology and internal medicine

the idea for this book arose from an integrated lecture course on the biochemistry of blood given to medical students in the second year of their pre clinical studies however the material in that course has been expanded and it is intended that the book provide both the medical and non medical reader with a concise and up to date account of the status of knowledge of the biochemistry of blood a glance at the chapter titles shows how wide a field this covers including many of the growth areas in biochemistry it is assumed that readers of the book will have a basic knowledge of biochemistry a functional approach is adopted and whenever possible the material is organised in terms of biochemical functions although there are separate chapters on the white cell and the red cello because of the clinical importance of analysing blood components and assaying enzymes in the diagnosis of disease chapters are included on the separation preparation and measurement of blood components
