In 1996 the shooting and killing of 16 young children in a Dunblane primary school provoked wide reaching parliamentary reform to British gun laws within months virtually all privately owned handguns had been outlawed. Gun culture or gun control presents the first substantial analysis of the social and political reactions to events in Dunblane and also examines many of the wider issues relating to gun control in the United Kingdom. Rigorously comparative throughout Peter Squires provides a non-partisan exploration of the differences between attitudes to firearms and their control in Britain and in the United States. Amongst the topics the author considers are the social history of firearms on both sides of the Atlantic, the differing policy directions adopted in Britain and the USA, media coverage of the gun question, firearms and policing, the future of the gun in society.

This is a new release of the original 1942 edition.

For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics. For public authorities to make reasonable decisions on these matters they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion. In performing these tasks legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies. Readers of the research literature on firearms may sometimes find themselves unable to distinguish scholarship from advocacy. Given the importance of this issue there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research. *Firearms and Violence* uses conventional standards of science to examine three major themes: firearms and violence, the quality of research and the quality of data available. The book assesses the strengths and limitations of current databases, examines current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved.
