this important book offers a meta theoretical account of educational theories and how they work it offers a classification scheme of distinct types of educational theory in which the account developed can inform the work of educational theorists and practitioners kvernbeck observes throughout how meta theoretical knowledge of the structure of theory types will improve the understanding and representation of educational phenomena and enhance theorists and practitioners ability to change those phenomena for the better she explains how philosophical accounts of scientific theories can help us understand the nature of educational theories by applying two influential but different theory conceptions the received view and the semantic conception to the field of education kvernbeck argues that educational theories like other scientific theories are representational devices that allow us to understand describe and explain phenomena and when desired to change them the classification scheme offered allows us to discriminate distinct types of educational theory goal directed equivalence and interlevel theories examples of all three types are discussed explaining their structure what they say about the phenomena and how they say it the book also offers a critical overview of different conceptions of practice and different understandings of the theory practice relationship encouraging a strong understanding of what theories say about the phenomena they represent this book will be of interest to educational researchers and postgraduate students in the fields of philosophy of education education theory and education policy and to philosophers of science and philosophers working on practical philosophical issues

this volume of original essays draws attention to the significance of daily human exchanges that are not only necessary for the survival of a social system but deeply influence the social construction of knowledge and the development of mores and social values

the debate over nature versus nurture in relation to intelligence is not as clearly drawn as it was ten years ago when geneticists claimed that intelligence is innate while environmentalists claimed that culture is the major determining factor although the debate has not been resolved it has been significantly refined robert sternberg and elena grigorenko address the roles and interaction of nature and nurture in intelligence heredity and environment this book provides a comprehensive balanced current survey of theory and research on the origins and transmission of human intelligence the book is unique in the diversity of viewpoints it presents and its inclusion of the very most recent theories and findings it highlights the search for genes associated with specific cognitive abilities interactionist theories cultural relativism educational strategies developmental perspectives and fallacies of previous intelligence research

from the preface my volume on the principles of sociology is described in the preface as an attempt to combine the principles of sociology in a coherent theory in plan and method the book is on the whole concrete rather than abstract consequently the theoretical propositions that it contains are scattered through many pages of descriptive and historical matter and are nowhere brought together in a didactic series it is therefore possible that not every reader of the volume has perceived the coherence of its theory and that classes using the book as a text have experienced a degree of difficulty in arranging its theoretical propositions in a consecutive order the theory assumes that certain adaptations of the individual to the physical world certain economic experiences ideas and activities and certain ethical experiences ideas and tendencies precede social life see the principles of sociology pp 41 45 100 103 239 the theory itself as distinguished from these presuppositions comprises the following propositions namely first certain affirmations about the

modes of aggregation which bring individuals that are more or less alike into contact and acquaintance second certain propositions about the more important modes of resemblance which may be observed in any aggregation of individuals third propositions about a consciousness of similarity or of kind which it is alleged is the true cause of social phenomena fourth propositions about the reactions of association and of the consciousness of kind upon individual motives conduct and character fifth propositions about the organization of the consciousness of kind into a social mind and about its expression in social purpose and control sixth propositions about the laws of social choice seventh propositions about the establishment of definite social relations and institutions by the social mind and eighth propositions about the persistence of social choices and institutions of these propositions the ones about the modes of resemblance and the consciousness of kind are of chief importance they contain or involve the entire theory

a comprehensive and illuminating guide to the principles of socialization discover the key concepts and theories that underpin our understanding of society and gain new insights into how we interact and shape one another as individuals and communities this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
