taxpayers often pay over more to the receiver than required and nowhere is this more evident than in the payment of value added tax there are thousands of vat vendors in south africa who are obliged to prepare a vat return every two months on the face of it the process is very simple record the vat paid in respect of producing your product or service subtract from this the vat received in respect of your product or service and pay the balance over to the receiver but in practice it is rather more complex as certain rules apply to what you can and cannot claim as a legitimate amount and on imports and exports related to your business tax consultants who service several returns at a time rush through the work with the result that large amounts often get overlooked through ignorance or haste and millions of rands go unclaimed or are paid over to the receiver unnecessarily but help is now at hand with the vat handbook everyone's essential guide on all matters concerning this tax

bringing together a highly diverse body of scholars this comprehensive research handbook explores recent developments at the intersection of international law sociology and social theory it showcases a wide range of methodologies and approaches including those inspired by traditional social thought as well as less familiar literature including computational linguistics performance theory and economic sociology the research handbook highlights anew the potential contribution of sociological methods and theories to the study of international law and illustrates their use in the examination of contemporary problems of practical interest to international lawyers

for the past decade arthur goldstuck has had a front row seat to witness the remarkable rise of ai across all sectors of business and society as generative ai becomes a household phrase and sparks hopes and fears of machines augmenting or replacing human beings this guide offers an invaluable overview of the past present and future of ai the hitchhiker s guide to ai is aimed at both beginners and those who consider themselves experienced or skilled at using ai it draws on many years of direct access to global and regional leaders in using ai from africa to the middle east to north america to europe and asia and it provides unique perspectives on generative ai as well as practical advice for using it it is useful for consumers academics professionals and anyone in business who wants to get up to speed quickly and practically it also entertains and inspires anyone who is curious about ai or already engaged in its possibilities need to understand or refine prompting you re in the right place need to prepare for the coming impact of ai on health travel education and business this is the book for you

presents diverse international in depth case studies while there are many books showcasing graphic design work few present in depth projects exploring concept design strategy visual problem solving and specifics illustrating the concrete use of design principles to achieve intended communication goals as a result readers are often left with only a surface understanding of how a project might have evolved or how the visual aspects of its design are brought together to convey its intended message the case studies in design evolution comprehensively demonstrate the real world application of visual principles discussed in a more formal educational context readers will understand how the principles for image layout type and color explored in volume 1 design elements work in combination to execute the overall solutions showcased in this volume the depth and range of content presented in these case studies distinguishes this book from all others in the design showcase genre offering readers a chance to not only be inspired by the quality and innovation of showcased projects but to understand how they were realized
