a comprehensive guide for geriatric care managers gcms to help define duties and procedures while providing guidelines for setting up a geriatric care practice from publisher description

as the baby boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging this is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 unlike any other time in history this demographic is the fastest growing segment of most developed countries in the united states the oldest old is projected to double from 4.3 million to 9.6 million by 2030 the increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care with this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia older persons are healthier today than their counterparts decades ago more importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity the inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases the oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old furthermore among the oldest old physiologically they are more diverse than other segments of the population their demographic characteristics are unparalleled and different compared to that of the younger old several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old as a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges this book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic this book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists it is divided into 3 sections general considerations chronic diseases and geriatric

syndromes each chapter provides a summary of important and essential information under the heading of key points case studies are included in some of the chapters to highlight the principles of management

prior to the evolution of modern medicine with its superabundance of diagnostic and therapeutic medical technology and the rise of the litigious society the value of clinical skills was evident in both history taking and the physical examination even today physicians can make a correct diagnosis solely by utilizing their clinical skills in about 90% of patient encounters furthermore in the past physicians understood their role as a psychologist and were more apt to be familiar with the social context of their patients house calls were common the doctor was also a placebo who at his best inspired hope and probably sped recovery geriatricians use both clinical skills and take advantage of modern technology sparingly for they know they are dealing with the most challenging and frail of patients older patients who so often present with multiple complex interacting behavioral social and physical problems in contrast to medicine

for young people working with the older patient is much more demanding furthermore the complex issue of societal attitudes toward old people can come into play especially the physician's need to deal with natural fears of aging dependency depression dementia and death ageism is the enemy of effective medical treatment at its best geriatrics exemplifies ways that medical care for all ages can become more humane problem oriented and holistic

this interdisciplinary clinical reference encompasses hundreds of current entries on a broad range of topics related to geriatrics and geriatric care across multiple health care disciplines the third edition reflects the many advances in geriatrics that have occurred since the publication of the second edition in 2006 it contains the updated evidence based contributions of more than 260 nationally recognized geriatric healthcare professionals regarding elder care concerns relating to society community caregiving and the individual
