author s preface this volume pulls together and republishes with some editing updating and additions articles written during 1978 86 for internal use within the cia directorate of intelligence four of the articles also appeared in the intelligence community journal studies in intelligence during that time frame the information is relatively timeless and still relevant to the never ending quest for better analysis the articles are based on reviewing cognitive psychology literature concerning how people process information to make judgments on incomplete and ambiguous information i selected the experiments and findings that seem most relevant to intelligence analysis and most in need of communication to intelligence analysts i then translated the technical reports into language that intelligence analysts can understand and interpreted the relevance of these findings to the problems intelligence analysts face the result is a compromise that may not be wholly satisfactory to either research psychologists or intelligence analysts cognitive psychologists and decision analysts may complain of oversimplification while the non psychologist reader may have to absorb some new terminology unfortunately mental processes are so complex that discussion of them does require some specialized vocabulary intelligence analysts who have read and thought
