debates surrounding the concept of law are not new for a wide variety of reasons and in a wide variety of ways the meaning of law has long been an important part of western thought both within legal scholarship and beyond the contributors to concepts of law are international experts from the fields of comparative law legal philosophy and the social sciences combining theoretical analyses with case studies they explore various legal concepts and contexts from diverse national and disciplinary perspectives legal and normative pluralism is a theme throughout some chapters discuss the development of state law and legal systems others wrestle with law's rhetoric and the potential utility of alternative vocabularies e.g. governance and governmentality others reveal the rich polyjurality of the present from the local to the global the result is a rich picture of both present scholarship on laws and norms and the state of contemporary legal complexity each crossing traditional boundaries

the concept of law lies at the heart of our social and political life shaping the character of our community and underlying issues from racism and abortion to human rights and international war but what actually is law a set of naturally occurring moral principles or simply rules agreed by a particular society what is a right and what rights should people actually have is law really colour blind and gender blind can the law truly tell us whether gay marriages are immoral what's wrong with racism or whether we should go to war revealing the intriguing and challenging nature of legal philosophy with clarity and enthusiasm raymond wacks explores the notion of law and its role in our lives referring to key thinkers from aristotle to rawls bentham dworkin h.l.a hart and derrida he looks at the central questions behind legal theory that have fascinated lawyers and philosophers and anyone who ever wondered about law's relation to justice morality and democracy about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

the last decade has witnessed a particularly intensive debate over methodological issues in legal theory the publication of julie dickson's evaluation and legal theory 2001 was significant as were collective returns to h.l.a hart's postscript to the concept of law while influential articles have been written in disparate journals no single collection of the most important papers exists this volume the first in a three volume series aims not only to fill that gap but also propose a systematic agenda for future work the editors have selected articles written by leading legal theorists including among others leslie green brian leiter joseph raz ronald dworkin and william twining and organized under four broad categories 1 problems and purposes of legal theory 2 the role of epistemology and semantics in theorising about the nature of law 3 the relation between morality and legal theory and 4 the scope of phenomena a general jurisprudence ought to address

legal theory the focus moves to the regions of interaction in which law and politics meet termed the policy of law the policy of law is characterized in this work as the stage of the law making process at which values entrenched in political decisions are transformed into legal concepts in order to fit the existing legal system the space labeled as policy of law is today mainly but not exclusively the domain of legal actors consequently the identification of a branch of the legal discipline specifically devoted to the investigation of the transformations of values into law is given the policy of law analysis finally whether and to what extent the policy of law analysis can be encompassed within the traditional legal discipline and more particularly as a part of jurisprudence is explored zamboni ranges broadly and knowledgeably over vast areas of legal theory but it is no mere taxonomising his argument is valuable and original it is clear learned and never boring zenon bankowski university of edinburgh
