this book offers in depth accounts of encounters between chinese and african social and  
economic actors that have been increasing rapidly since the early 2000s with a clear  
focus on social changes be it quotidian behaviour or specific practices the authors employ  
multi disciplinary approaches in analysing the various impacts that the intensifying  
interaction between chinese and africans in their roles as ethnic and cultural others  
entrepreneurial migrants traders employers employees etc have on local developments

and transformations within the host societies be they on the african continent or in china the dynamics of social change addressed in case studies cover processes of social mobility through migration adaptation of business practices changing social norms consumption patterns labour relations and mutual perceptions cultural brokerage exclusion and inclusion gendered experiences and powerful imaginations of china contributors are karsten giese guive khan mohammad katy lam ben lampert kelly si miao liang laurence marfaing gordon mathews giles mohan amy niang yoon jung park alena thiel naima topkiran

despite the dynamic growth of its economy over the last 20 years china still has a long way to go to catch up with japan in commercial and technological terms japan is still the dominant economy in east asia and is still the leading source of product production and management innovations in the region especially in the automotive and electronic industries however china is closing the gap year by year the development of bilateral foreign trade the increase of japanese fdi and oda towards china and intensified financial and technical co operation illustrate the considerable potential for mutually profitable business the chinese market is opening up and chinese products are increasingly gaining competitiveness in world markets threatening the incumbent japanese firms japanese and chinese companies face each other across a changing competitive environment which is posing new challenges to corporate and business strategies within the context of these developments this book looks from different perspectives at how japanese companies are reacting to the challenges and opportunities offered by china

in contemporary discourse on china africa relations there are on the one hand the sino pessimists who see china as a giant vacuum cleaner sucking up africa s resources in order to fuel its own rapid industrialization and destroying africa s development potential in the process on the other hand the sino optimists see china as the ultimate savior of africa capable of or willing to develop the continent between the two divergent schools of thought are those sitting on the fence for the time being the sino pragmatists who are less sanguine for sure about what africa would gain from china africa relations but are nevertheless willing to reserve judgment until the dust settles this book is innovative in

two ways it introduces a regional approach to the study of china africa relations by focusing on eastern and southern africa and it puts forward a disciplinary framework disciplinary in both senses of that term for interrogating the burgeoning literature about china africa relations by conceptualizing the three schools of thought mentioned above

since the late 1970s china has experienced an unprecedented pace of urbanization in 1978 only 17.8% of the population resided in urban areas but by 2013 the level of urbanization had reached 53.8% during the same period china also enjoyed spectacular economic growth china had become the second largest economy in the world by 2012 just behind the united states despite china's highly acclaimed achievements in urbanization and its economic miracle urban china confronts a set of significant challenges this book provides theoretically informed and empirically rich analyses of some of the key challenges facing china's urbanization the first part deals with new patterns of urbanization focusing on comprehensive measures and environmental dimensions of urbanization the second part of the book focuses on several aspects related to migrants in cities migrant entrepreneurship return migration and local people's attitudes toward migrants the final section examines two key issues important for migrants urban local residents and policy makers that have become quite contentious in china today housing and urban health care this collection presents original cutting edge research on some of the most pressing challenges confronting contemporary urban china conducted by researchers from multiple social science disciplines it will appeal to scholars and advanced students of urban studies and china studies as well as those in sociology anthropology geography and political science

china's accession to the world trade organization wto has been hailed as the biggest coming out party in the history of capitalism its membership eventually will contribute to higher standards of living for its citizens and increased growth for its economy but why would the chinese communist regime voluntarily agree to comply with the many complex rules of the global trading system since it has already become the world's seventh largest trading country while avoiding these constraints by remaining outside the system the answer to this question forms the basis for this new book nicholas lardy explores the many pressures on the chinese government both external and internal to comply with the

standards of the rule based international trading system lardy points out that prior to entry into the wto china enjoyed high growth rates and more foreign direct investment than any other emerging economy he draws on a wealth of scholarship and experience to explain how china s leadership expects to leverage the increased foreign competition inherent in its wto commitments to accelerate its domestic economic reform program leading to the shrinkage and transformation of inefficient money losing companies and hastening the development of a commercial credit culture in its banks lardy answers a number of other questions about china s new wto membership including its effects on bilateral trade with the united states the possibility that china will use its power to reshape the wto in the future the degree to which the terms of china s entry were more or less demanding than those for other new members the ability of china s economy to successfully open to new imports and the prospects for new growth in various sectors of china s economy made possible by wto accession this book will become an important tool for those who wish to understand china s new role in the global trading system to take advantage of the new opportunities for investment in china

where can one get a synthesis of research findings on urban development planning in africa this book addresses this gap in knowledge by distilling existing research to provide insights into theories research designs empirical findings and approaches on urban development planning in africa starting with the overall planning culture and strategies the book chapters move on to specific themes such as governance population poverty water recreation transport agriculture air quality and rural urban linkages this book reduces the prevailing risk of unnecessary duplication of research and the inadequate attention that is being given to extending research in new areas this situation has partly been due to existing research remaining scattered in different organizations and publications and has not been subjected to critical synthesis to unearth any new developments that it contains the book makes available research findings to be utilized in current and future urban development planning in africa

today there are over a billion vehicles in the world and within twenty years the number will double largely a consequence of china s and india s explosive growth given that greenhouse gases are already creating havoc with our climate and that violent conflict in

unstable oil rich nations is on the rise will matters only get worse or are there hopeful signs that effective realistic solutions can be found blending a concise history of cars and their impact on the world leading transportation experts daniel sperling and deborah gordon explain how we arrived at this state and what we can do about it sperling and gordon assign blame squarely where it belongs on the auto industry short sighted government policies and consumers they explore such solutions as getting beyond the gas guzzler monoculture re inventing cars searching for low carbon fuels and more promising advances in both transportation technology and fuel efficiency together with shifts in traveler behavior they suggest offer us a way out of our predicament the authors conclude that the two places that have the most troublesome emissions problems california and china are the most likely to become world leaders on these issues arnold schwarzenegger s enlightened embrace of eco friendly fuel policies which he discusses in the foreword and china s forthright recognition that it needs far reaching environmental and energy policies suggest that if they can tackle the issue effectively and honestly then there really is reason for hope updated with a new afterword that sheds light on the profound changes in the global economy in the last year two billion cars makes the case for why and how we need to transform transportation now more than ever authoritatively prescriptive tom vanderbilt wilson quarterly provocative and pleasurable far seeing and refreshing fact based and yet a page turner global in scope but rooted in real places the authors make a convincing case that smart consumers driving smart electric drive cars can find the critical path to a safer planet robert socolow princeton university in this insightful and persuasive book sperling and gordon highlight one of the biggest environmental challenges of this century two billion cars they rightly contend that we cannot avert the worst of global warming without making our cars cleaner and petroleum free luckily the authors also offer a roadmap for navigating this problem that is both visionary and achievable frances beinecke president natural resources defense council
