evaluation is a critical stage in urban and regional planning and development with the consideration of alternative proposals essential for informed debate and decision the craft of pre development evaluation has long been influenced by nathaniel lichfi

this book provides recently developed and tested methods for assessing the strengths and weaknesses of planning and policy options several contributions focus on new substantive areas of concern in planning evaluation including environmental justice and sustainable urban development applications of evaluation in several planning contexts are demonstrated and special problems that these pose are assessed several chapters address how to communicate the process and results to several stakeholder groups and how to engage these groups in the evaluation process each chapter employs a real world case in practice thus dealing with the complexity of applying planning evaluation and providing practical advice useful in similar situations

this book is the result of a three day workshop on evaluation in theory and practice in spatial planning held in ramsey hall university college london in september 1996 some 30 people from 8 different countries attended and 20 papers were presented the majority of them now form the basis for this book this occasion was the third on the topic the two preceding having taken place in umea in june 1992 and in bari in 1994 following these three meetings we can now say that this small industrious international family really enjoy meeting up from time to time at each others places in the presence of older members and new children each one presenting his her own recent experiences it particularly enjoys exchanging views and arguing about the current state and the future of evaluation in spatial planning all families have their vices it is also pleasing to see these experiences and discussions resulting in a book for those who could not attend and for the broader clan in the field not long time ago but ages in the accelerated academic time scale evaluation in planning established its own role and distinct features as an instrument for helping the decision making process now this role and these features are exposed to major challenges first the evolution of planning theory has lead to the conception of new planning paradigms based on theories of complexity and communicative rationality

concentrates on the steps vital to program evaluation including systematically identifying stakeholder needs selecting evaluation options best suited to particular needs and turning decisions into action

this book guides evaluators in planning a comprehensive yet practical program evaluation from start to design within any context in an accessible manner

rutman presents a method of assessing the value of an evaluation before undertaking the research an evaluability assessment is in effect a feasibility study it identifies which programmes or aspects of programmes can appropriately and effectively be measured in order to conduct an effective evaluation

despite the increasing necessity for needs assessments in a variety of fields much confusion still prevails on how to conduct such assessments successfully this book is a practical guide to that end the authors first introduce a three phase model preassessment assessment and postassessment to clarify the distinctions between the needs of primary service recipients and the people and resources that exist they go on to describe methods appropriate for gathering data for assessing needs and for causal analysis the presentation of the framework the coverage of several approaches for analyzing data the balanced description of qualitative and quantitative methodologies and the multiple case studies and

the purpose of this workbook is to help public health program members administrators and evaluators develop a joint understanding of what constitutes an evaluation plan why it is important and how to develop an effective evaluation plan in the context of the planning process
