this book is a compilation of selected papers from the sixth international symposium on software reliability industrial safety cyber security and physical protection of nuclear power plant held in october 2021 in zhuji zhejiang china the purpose of this symposium is to discuss inspection test certification and research for the software and hardware of instrument and control i c systems in nuclear power plants npp such as sensors actuators and control system it aims to provide a platform of technical exchange and experience sharing for those broad masses of experts and scholars and nuclear power practitioners and for the combination of production teaching and research in universities and enterprises to promote the safe development of nuclear power plant readers will find a wealth of valuable insights into achieving safer and more efficient instrumentation and control systems

the standard laboratory tools in the modern scientific world include a wide variety of electronic instruments used in measurement and control systems this book provides a firm foundation in principles operation design and applications of electronic instruments commencing with electromechanical instruments the specialized instruments such as signal analyzers counters signal generators and digital storage oscilloscope are treated in detail good design practices such as grounding and shielding are emphasized the standards in quality management basics of testing compatibility calibration traceability metrology and various iso 9000 quality assurance guidelines are explained as well the evolution of communication technology in instrumentation is an important subject a single chapter is devoted to

the study of communication methods used in instrumentation technology there are some areas where instrumentation needs special type of specifications one such area is hazardous area the technology and standards used in hazardous areas are also discussed an instrumentation engineer is expected to draw and understand the instrumentation drawings an appendix explains the symbols and standards used in p i diagrams with several examples besides worked out examples included throughout end of chapter questions and multiple choice questions are also given to judge the student s understanding of the subject practical and state of the art in approach this textbook will be useful for students of electrical electronics and instrumentation engineering

this book reviews the u s national aeronautics and space administration s nasa small spacecraft technology development included are assessments of nasa s technology priorities for relevance to small spacecraft and identification of technology gaps and overlaps the volume also examines the small spacecraft technology programs of other government agencies and assesses technology efforts in industry

agricultural automation is the emerging technologies which heavily rely on computer integrated management and advanced control systems the tedious farming tasks had been taken over by agricultural machines in last century in new millennium computer aided systems automation and robotics has been applied to precisely manage agricultural production system with agricultural automation technologies sustainable agriculture is being developed based on efficient use of land increased conservation of water fertilizer and energy resources the agricultural automation technologies refer to related areas in sensing perception reasoning learning data communication and task planning execution since the literature on this diverse subject is widely scattered it is necessary to review current status and capture the future challenges through a comprehensive monograph in this book we focus on agricultural automation and provide critical reviews of advanced control technologies their merits and limitations application areas and research opportunities for further development this collection thus serves as an authoritative treatise that can help researchers engineers educators and students in the field of sensing control and automation technologies for production agriculture

the 2012 international conference on emerging computation and information technologies for education ecice 2012 was held on jan 15 16 2012 hangzhou china the main results of the conference are presented in this proceedings book of carefully reviewed and accepted paper addressing the hottest issues in emerging computation and information technologies used for education the volume covers a wide series of topics in the area including computer assisted education educational
