this practical conceptual introduction to statistical analysis by award winning teacher andrew n christopher uses

published research with inherently interesting social sciences content to help students make clear connections between statistics and real life using a friendly easy to understand presentation christopher walks students through the hand calculations of key statistical tools and provides step by step instructions on how to run the appropriate analyses for each type of statistic in spss and how to interpret the output with the premise that a conceptual grasp of statistical techniques is critical for students to truly understand why they are doing what they are doing the author avoids overly formulaic jargon and instead focuses on when and how to use statistical techniques appropriately

heart over height tells the motivational story of how three time nba slam dunk champion nate robinson combined an unstoppable will with dogged determination to achieve his goals and how those traits can apply to anyone facing their own seemingly insurmountable obstacles

while the starting lineup of an nba team consists of five players there are at least 12 on each roster allocating time on court to keep each of them satisfied is challenging theoretically the worst position on the roster is the sixth man so close to being the starter yet seeming to be the odd man out this book aims at dispelling that notion presenting many important players who through the years came off the bench for nba teams proving that despite not starting they were worthy of playing in the best basketball league in the world

a wonderful book thoughtful fascinating malcolm gladwell do you believe some people are born athletes is sporting talent innate or something that can be achieved through endurance and practise in this ground breaking and entertaining exploration of athletic success award winning writer david epstein gets to the heart of the great nature

vs nurture debate and explodes myths about how and why humans excel along the way epstein exposes the flaws in the so called 10 000 hour rule that states that rigorous practice from a young age is the only route to success shows why some skills that we imagine are innate are not like the bullet fast reactions of a baseball player uncovers why other characteristics that we assume are entirely voluntary like the motivation to practice might in fact have important genetic components throughout the sports gene forces us to rethink the very nature of success
