this vault guide offers the inside scoop on publishing jobs and how to get them

this book demonstrates falsified economic performance of global economies when the environment is not recognised as a capital and when the ecosystem is overlooked towards sustainable development seck begins with an analysis of standard macroeconomic framework and policy practice he argues with reference to environmental accounting literature that environmental capital must form an integral component of economic measurement this paves the way for an alternative environmental macroeconomics framework for policy analysis that promotes

sustainable development the book demonstrates how environmental capital can be measured with reference to select oecd countries and provides a methodology for analysing how macroeconomic goals are related to a steady state economy seek then concludes with a summary of the conflict between current economic growth and ecosystem preservation and outlines possible policy improvements and directions for research rethinking sustainable development is an invaluable reference for policymakers as well as researchers and students of environmental economics sustainable development and macroeconomics

experts discuss the potential for open education tools resources and knowledge to transform the economics and ecology of education given the abundance of open education initiatives that aim to make educational assets freely available online the time seems ripe to explore the potential of open education to transform the economics and ecology of education despite the diversity of tools and resources already available from well packaged course materials to simple games for students self learners faculty and educational institutions we have yet to take full advantage of shared knowledge about how these are being used what local innovations are emerging and how to learn from and build on the experiences of others opening up education argues that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge by providing incentives for faculty to use and contribute to open education goods and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs these essays by leaders in open education describe successes challenges and opportunities they have found in a range of open education initiatives they approach from both macro and micro perspectives the central question of how open education tools resources and knowledge can improve the quality of

education the contributors from leading foundations academic institutions associations and projects discuss the strategic underpinnings of their efforts first in terms of technology then content and finally knowledge they also address the impact of their projects and how close they come to achieving a vision of sustainable transformative educational opportunities that amounts to much more than pervasive technology through the support of the carnegie foundation for the advancement of teaching an electronic version of this book is openly available under a creative commons license at the mit press site mitpress.mit.edu contributors richard baraniuk randy bass trent batson dan bernstein john seely brown barbara cambridge tom carey catherine casserly bernadine chuck fong ira fuchs richard gale mia garlick gerard hanley diane harley mary huber pat hutchings toru iiyoshi david kahle m s vijay kumar andy lane diana laurillard stuart lee steve lerman marilyn lombardi phil long clifford lynch christopher mackie anne margulies owen mcgrath flora mcmartin shigeru miyagawa diana oblinger neeru paharia cheryl richardson marshall smith candace thille edward walker david wiley

the discipline of technology management focuses on the scientific engineering and management issues related to the commercial introduction of new technologies although more than thirty u s universities offer phd programs in the subject there has never been a single comprehensive resource dedicated to technology management the handbook of technology management fills that gap with coverage of all the core topics and applications in the field edited by the renowned doctor hossein bidgoli the three volumes here include all the basics for students educators and practitioners

the emergence of affordable micro sensors such as mems inertial measurement systems which are being applied in embedded systems and internet of things devices has brought techniques such as kalman filtering capable of combining information from multiple sensors or sources to the interest of students and hobbyists this will book will develop just the necessary background concepts helping a much wider audience of readers develop an understanding and intuition that will enable them to follow the explanation for the kalman filtering algorithm

the subject of applied complex variables is so fundamental that most of the other topics in advanced engineering mathematics aem depend on it the present book contains complete coverage of the subject summarizing the more elementary aspects that you find in most aem textbooks and delving into the more specialized topics that are less commonplace the book represents a one stop reference for complex variables in engineering analysis the applications of conformal mapping in this book are significantly more extensive than in other aem textbooks the treatments of complex integral transforms enable a much larger class of functions that can be transformed resulting in an expanded use of complex transform techniques in engineering analysis the inclusion of the asymptotics of complex integrals enables the analysis of models with irregular singular points the book which has more than 300 illustrations is generous with realistic example problems
