students want to learn and excel as learners however a student cannot learn optimally on his or her own especially if a student had not already learned how to learn student may be ineffective and or unproductive in learning independently student learns best how to learn from adults that can provide such learning however in the name of educating a child an adult may imposed tasks upon student here student learn to pay attention to imposed tasks just enough to get a disciplinarian who imposed tasks off their backs while secretly devoting attention to concerns that are truly of interest to the students furthermore an adult may sugar coat a task in order to shield student from the unpleasant the experience of tasks and in their minds facilitate student learning here student may engage task but student learns in the task that it is his or her whims that are important he or she learn to make demands or otherwise fail to do assigned tasks in both cases students do not learn to learn well we cannot say that a student is learning well when all that a student may be doing is pay just enough attention to imposed task to get a disciplinarian off his or her back while secretly devoting attention to concerns that are truly of interest to the students similarly we cannot say that a student is learning when all that students is doing is practicing and or becoming increased practiced in making demands and failing to do assigned tasks some teachers may be moderate when they commit these mistakes and they convince themselves that because they are not extreme they therefore do not harm students this may be right in so far as human limitations prevent us from having an absolute best
