outstanding a great guide for teachers who want to succeed with every student they teach william glasser teachers everywhere face the daily challenge of engaging students whose knowledge skills needs and temperaments vary greatly how does a teacher establish a learning environment that supports the class as a whole while meeting the particular needs of individual students teacher jonathan c erwin believes the answer lies in offering real opportunities to students rather than throwing up the obstacles inherent in traditional discipline and motivation techniques at the heart of his approach are the five basic human needs of william glasser s choice theory survival and security love and belonging power through cooperation and competency freedom and fun by understanding and attending to these needs teachers can customize and manage a classroom environment where students learn to motivate and monitor themselves drawing on theories and practices from experts in a variety of learning techniques erwin explores each of the five basic needs to create nearly 200 adaptable strategies for teaching and classroom management at any grade level readers will find dozens of ideas for helping students make positive changes including improving their work habits connecting curriculum with individual interests opening lines of communication with teachers and other students boosting self worth through accomplishment

and supporting their classmates in cooperative work erwin ties everything together in a unit guide that allows teachers to develop a classroom profile based on the needs of individual students the guide can be used with any district planning approach or curriculum for teachers seeking a win win situation in managing their classrooms the classroom of choice is an excellent aid in creating a learning environment in which students and teachers approach each day with energy and enthusiasm

students want to learn and excel as learners however a student cannot learn optimally on his or her own especially if a student had not already learned how to learn student may be ineffective and or unproductive in learning independently student learns best how to learn from adults that can provide such learning however in the name of educating a child an adult may imposed tasks upon student here student learn to pay attention to imposed tasks just enough to get a disciplinarian who imposed tasks off their backs while secretly devoting attention to concerns that are truly of interest to the students furthermore an adult may sugar coat a task in order to shield student from the unpleasant the experience of tasks and in their minds facilitate student learning here student may engage task but student learns in the task that it is his or her whims that are important he or she learn to make demands or otherwise fail to do assigned tasks in both cases students do not learn to learn well we cannot say that a student is learning well when all that a student may be doing is pay just enough attention to imposed task to get a disciplinarian off his or her back while secretly devoting attention to concerns that are truly of interest to the students similarly we cannot say that a student is learning when all that students is doing is practicing and or becoming increased practiced in making demands and failing to do assigned tasks some teachers may be moderate when they commit these mistakes and they convince themselves that because they are not extreme they therefore do not harm students this may be right in so far as human limitations prevent us from having an absolute best learning practice method however in terms of having a best focus that would help students to learn well many teachers fail because they do not learn what to look for in helping students to learn well in thinking and learning we advance the theory that to help students to learn well teachers must learn to focus upon student interest dewey 1934 point out that without an

understanding of student interest a teacher may not know the direction a student is heading without an understanding of student interest a teacher may not be able to help students to learn well and students grope in thinking and learning we define interest in terms of tendencies that one expresses when in the midst of objects problems we point out that in interest one seeks to extricate self from problems one thinks we point out that this type of thinking differs from thinking where one is seeking to secure an object advantage and gratify self in the last chapters of thinking and learning we develop an instructional program that focus upon fundamentals of what and how a student does when a student is in the midst of objects or problems and seeking to extricating self from them just as we focus upon fundamentals of what and how a student does in a task situation when a student seeks to accomplish tasks and secure a represented advantage we point out that the learning that is of significance to student is one in which student learn to generate develop and consider their concerns accordingly in the last chapters of thinking and learning you will learn about the instructional methods of goal and task thinking and learning gttl here goal thinking and teaching refer to student tendencies when a student is determining a direction for self and task thinking and teaching refer to student tendencies when a student is executing a plan to secure a determined advantage

acknowledging that teachers make a difference not only to what students learn about content but what they learn about life this volume offers discussion of topics including setting high expectations for students conveying confidence creating classroom rituals traditions much more

successful students are not necessarily smarter than their less successful peers they have simply mastered the art of efficient learning adam robinson introduces high school and college students to an innovative approach that can help them achieve top grades while discovering the joy of true learning

this is a guide for classroom teachers working with urban learners english language learners and students from generational poverty aiming to close the so-called achievement gap the book covers brain research relating to diverse learners developing lessons that include pluralizing identifying and eliminating bias and more

how do students truly learn what is the best way to teach where do you go for help every day you face the challenge of engaging students in learning often to disappointing results this book provides a myriad of voices at your side supporting you with sound educational philosophy and practical ideas for teaching your students teaching the way students learn practical applications for today's classrooms helps you explore the social constructivist paradigm through instructional strategies and true life teaching memoirs constructivism is more than an ism it explains how students learn and this book provides both philosophy and practicality to bring constructivist teaching to life in the classroom teaching and learning using a social constructivist lens can transform the classroom helping you become change agents for your students and leaders for your schools

in how students learn reforming schools through learner centered education leaders in the psychological and educational communities suggest that successful school reform must not only uphold standards but also must recognize students differences and unique learning styles the volume examines current research on how students learn and presents the theoretical perspectives and research findings of leading authors in educational psychology the chapters reflect the work of these distinguished educators and psychologists in developing and articulating the psychological knowledge base that is most relevant to education

project based learning is a teaching approach that motivates and inspires students to learn and helps them to become self directed learners over time students learn not only the content surrounding their projects but also important life skills such as problem solving creativity collaboration communication time management and responsibility author scott wurdinger has implemented this approach over the past ten years in his own classrooms has conducted numerous research studies on this topic and has seen the effectiveness of project based learning firsthand this book provides information on the history research and application of the project based learning approach and should be read by educators who want to change their classrooms into dynamic exciting learning environments educators will learn everything they need to know about how to implement this approach in their classrooms as well as how to help students create meaningful relevant projects that can help impact and solve school community and even global problems read this book and bring project based learning to your classroom

learning how to study is extremely important to success in school the techniques and skills associated with studying are rarely taught in the average classroom it is my fondest professional dream that this will change i urge colleges and universities preparing our future teachers to incorporate the art and science of how to learn to learn in all teacher preparation courses teaching our children how to study will positively impact their self confidence their academic performance and contribute to their personal success i salute the work of dr daniel willingham psychology professor at the university of virginia who was ranked as the country s 10th most influential education scholar to quote dr willingham your

brain doesn't come with a user's manual independent learning calls for many separate skills and you needed someone to teach you most likely no one did education needs to heed and answer students cry of help me I issue a challenge to all education professionals teach your students the art and science of studying the rewards are endless

learning for uncertainty explores technology's role in education specifically unpacking the question how should educators prepare today's children for a world that has yet to be made as technology evolves faster than our capacity to fully understand the social cultural economic and moral implications of many innovations today's educators are tasked with the unique role of preparing students to capitalize on technology's opportunities and also mitigate its dangers to their society to democratic processes and to institutions veteran educators McDiarmid and Zhao explore the implications of emerging technologies for future jobs organizations students and learning covering topics such as the future of work and workers as technology eliminates some industries while creating new ones potential futures both bright and dark awaiting students the qualities dispositions social behaviors and skills that are likely to advantage students in the future the possibility of technology to revolutionize education in ways that will better position students for an uncertain future how technology can free teachers from time and effort devoted to routine matters to instead assuming roles that are potentially more satisfying and supportive of their students learning learning opportunities and educator roles that have the potential to bring about needed changes capitalizing on these uncertain times to rethink curriculum pedagogy opportunities to learn and the organization of school as well as the roles of students educators parents and policymakers this latest book in the Routledge Leading Change series is ideal reading for educators and policymakers in both P-12 and higher education interested in ensuring our education systems provide the experiences and learning opportunities necessary to cultivate the innovative iconoclastic and generative thinkers and creators needed for a future that nourishes the minds bodies and spirits of all

great teachers make great schools they are the ones who work tirelessly to help students learn grow and achieve the ones who make sure parents are satisfied with their children's learning experience and the ones who never give up but what role do great school and district leaders play quite simply they create the conditions that foster and nourish a school full of great

teachers as a new leader or a seasoned one your mission is to hire only the best teachers you can to support everyone under your directorship to consistently turn in a performance that has a profound impact on students that's where this new book comes in how to lead teachers to become great by Janet Pilcher and Robin Largent helps education leaders create great places for teachers to teach students to learn and places for parents to send their children the book is structured around five evidence based classroom learning principles and 14 tactics that fall underneath them which result in improved learning results improved parental satisfaction and improved teacher performance it will help school leaders recruit and retain highly effective teachers provide techniques for dealing with low performing teachers help leaders create a results driven culture guide teachers on what they can expect from leaders focus teachers on what students are learning rather than what they themselves are teaching ultimately every idea in how to lead teachers to become great is aimed at helping students achieve outstanding results which is after all the goal of everyone involved page 4 of cover
