in from the american system to mass production david a hounshell has provided a detailed thoughtful and comprehensive examination of american industrial technology from the early 1800s through the 1930s lavishly illustrated with 19th century prints and more recent photographs of factory interiors and industrial products this important work traces the direct and indirect routes down the road toward modern american industrial civilization for business and labor historians and for historians of american technology and industrialization hounshell s book will fill many gaps in the history of the technical contours of modern industrial america the book begins with an examination of the origins of the american system of manufactures in government and private arms production and then moves to the sewing machine woodworking agricultural equipment bicycle and automobile industries it touches on the important inventors and innovators and describes their fundamental contributions in these american industries most of the principal figures and institutions are covered simeon north eli whitney thomas blanchard john h hall and samuel colt in armories eli terry and seth thomas in the clockmaking industry the wheeler and wilson willcox and gibbs and singer sewing machine firms the singer woodworking plant the mccormick reaper works the columbia pope and western wheel works bicycle companies and the ford and general motors automotive corporations hounshell s work is a major contribution

to the social history of technical innovators and their innovations all in all from the american system to mass production is an impressive work in his documentation of the history of american industrial technology hounshell has demonstrated the slow evolution and the near failure of large scale capital intensive and work degrading industrial systems whereas other historians of technology have tended to tread too lightly on the social dimensions of technical change hounshell has provided an excellent social analysis of the networks of innovators and their role in the diffusion of armory practices and other industrial advances from industry to industry technology and culture mr hounshell is an enthusiastic lively writer yet very careful scholar he is cautious in his conclusions and candid about what is debatable he offers several sides of every issue he does not judge particular technologies as good or bad what stands out in this history is how slowly what appears to be a sensible productive and efficient system of manufacturing was adopted chiefly because it required a change in the mind set of managers changes in skills and work habits of workers and disciplined procedures and practices throughout the plants new york times book review david hounshell s history of the evolution of american production methods has few rivals in execution of the theme it has none hounshell carefully documents the development transfer and modification of the technology of the manufacture of interchangeable parts from firm to firm and industry to industry a series of excellent technical photographs and hounshell s own field trials support his argument science a meticulous study of mass production s roots and early flowering an able researcher hounshell follows the trail of early manufacturing ideas and shows how they were gradually perfected and diffused throughout different industries before converging in ford s miracle at highland park wall street journal an important study which offers a convincing reinterpretation of the development of mass production in the united states hounshell has combined substantial new archival research with a synthesis of the mass of new work completed by others in the past three decades journal of economic history

david a hounshell s widely acclaimed history explores the american genius for mass production and traces its origins in the nineteenth century american system of manufacture previous writers on the american system have argued that the technical problems of mass production had been solved by armsmakers before the civil war drawing upon the extensive business and manufacturing records if leading american firms hounshell demonstrates that the diffusion of arms production technology was neither as fast now as smooth as had been assumed exploring the manufacture of sewing machines and furniture bicycles and reapers he shows that both the expression mass production and the technology that lay behind it were developments of the twentieth century attributable in large part to the ford motor company hounshell examines the importance of individuals in the diffusion and development of production technology and the central place of marketing strategy in the success of selected american manufacturers whereaas ford was the seedbed of the assembly line revolution it was general motors that initiated a new era with its introduction of the annual model change with the new marketing strategy the technology of the changeover became of paramount importance hounshell chronicles how painfully ford learned this lesson and recounts how the successful mass production of automobiles led to the establishment of an ethos of mass production to an era in which propoments of fordism argued that mass production would solve all of america s social problems

it is always hard to set manufacturing systems to produce large quantities of standardized parts controlling these mass production lines needs deep knowledge hard experience and the required related tools as well the use of modern methods and

techniques to produce a large quantity of products within productive manufacturing processes provides improvements in manufacturing costs and product quality in order to serve these purposes this book aims to reflect on the advanced manufacturing systems of different alloys in production with related components and automation technologies additionally it focuses on mass production processes designed according to industry 4 0 considering different kinds of quality and improvement works in mass production systems for high productive and sustainable manufacturing this book may be interesting to researchers industrial employees or any other partners who work for better quality manufacturing at any stage of the mass production processes

additional contributors include c e hook c l schweitzer g m fullarton and others

underpinned by extensive research manufacturing the future highlights and reconfirms the importance of manufacturing strategy as part of the overall business strategy shows firms how to radically re appraise the way they are organised including the role of manufacturing personnel describes the importance of the role of senior manufacturing personnel to the business shows how to successfully apply manufacturing strategies which feed into and form part of the overall success of the business strategy shows both why and how manufacturing firms need to move away from traditional unsuccessful approaches to become an enlightened successful outfit
