does the christian faith have scientific evidence this is difficult to believe however since dna was discovered we now understand the entire dna coding sequence of humans is consistent and the difference is only one thousandth the theory of mathematics probability tells us that it could not be the result of spontaneous generation therefore the molecular biologist put forward that people of the whole world have the common grandfather y chromosome adam theory and the common grandmother eve theory do you agree what is amazing is that there is no difference between man s and woman s 29 billion chromosomal dna coding sequence meaning that human dna coding is from one individual only men have the complete set of the chromosome so the source individual must be a man and the first woman was from the man the first man had no carnal parents and it only could be adam created by god due to the constancy of biological genome dna coding it is impossible for any species to have an evolution connection not even microevolution this is what is recorded in the bible as all living from each category it therefore can be seen that life s dna coding sequence is from god s creation from our dna we could see that all the substances and lives in the universe are created by god these scientific facts are totally consistent with the biblical record and are objective evidence of the christian faith
