most obstetricians and pediatricians would agree that the examination of the placenta often helps to explain an abnormal neonatal outcome as early as in 1892 bal lantyne wrote that a diseased foetus without its placenta is an imperfect specimen and a description of a foetal malady unless accompanied by a notice of the placental condition is incomplete deductions drawn from such a case cannot be considered as conclusive for in the missing placenta or cord may have existed the cause of the disease and death during intrauterine life the foetus the membranes the cord and the placenta form an organic whole and disease of any part must react upon and affect the others similar thoughts were succinctly detailed in price s discussion of his concept of the prenatal biases as they affected twins his contribution also admonishes us that placental study is a sine qua non for a more perfect understanding of fetal development 1950 despite all this understanding of the past and appreciation for placental disease great resistance still exists to

performing the task of placental examination routinely for many pathologists therefore the placenta has remained a mysterious organ
