this study documents the speed reduction impacts of two dynamic electronic school zone speed limit signs at united community schools between ames and boone iowa the school facility is situated along us highway 30 a rural four lane divided expressway due to concerns about high speeds in the area the iowa department of transportation dot decided to replace the original static school zone speed limit signs which had flashing beacons during school start and dismissal times with electronic speed signs that only display the reduced school speed limit of 55 mph during school arrival and dismissal times the center for transportation research and education ctre at iowa state university isu conducted a speed evaluation study one week before and 1 month 7 months and 14 or

15 months after the new signs were installed overall the new dynamic school zone speed limit signs were more effective in reducing speeds than the original static signs with flashing beacons in the 1 month after period during the 7 and 14 month after period speeds increased slightly for the eastbound direction of traffic however the increases were consistent with overall speed increases that occurred independent of the signs the dynamic electronic signs were effective for the westbound direction of traffic for all time periods and for both start and dismissal times even though only modest changes in mean and 85th percentile speeds occurred with the speed decreases the number of vehicles exceeding the school speed limit decreased significantly indicating the signs had a significant impact on high end speeders
