excerpt from lecture notes on some of the business features of engineering practice in preparing the second edition of my lecture notes certain

additions have been suggested by the experience of the classroom and by changes almost revolutionary which have taken place in the industrial field as explained in the introduction to the first edition the lectures and papers contained in reprints were collected originally for the purpose of cultivating in the students a sympathetic attitude of mind toward the more specific instruction to follow experience in the classroom has shown that these papers can also be usefully employed as suggestive material for experience talks therefore with the added addresses they have been included in this volume as part i in part ii i have brought together my own lecture notes which appeared originally in the first edition of these notes and its several supplements much of this material has been rearranged to bring it into better sequence and portions have been rewritten wholly or in part considerable new material has been added particularly on the all important subject of depreciation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

empirical verification of knowledge is one of the foundations for developing any discipline as far as software construction is concerned the empirically verified knowledge is not only sparse but also not very widely disseminated among developers and researchers this book aims to spread the idea of the importance of empirical knowledge in software development from a highly practical viewpoint it has two goals 1 define the body of empirically validated knowledge in software development so as to advise practitioners on what methods or techniques have been empirically analysed and what the results were 2 as empirical tests have traditionally been carried out by universities or research centres propose techniques applicable by industry to check on the software development technologies they use

this book draws together the most interesting recent results to emerge in mechanical engineering in russia providing a fascinating overview of the state of the art in the field in that country which will be of interest to a wide readership a broad range of topics and issues in modern engineering are discussed including dynamics of machines materials engineering structural strength transport technologies machinery quality and innovations the book comprises selected papers presented at the 9th conference modern engineering science and education held at the peter the great saint petersburg polytechnic university in june 2020 with the support of the russian engineering union the authors are experts in various fields of engineering and all of the papers have been carefully reviewed the book will be of interest to mechanical engineers lecturers in engineering disciplines and engineering graduates

supply chain management often known as scm refers to the extensive variety of operations that are required to plan monitor and coordinate the movement of a product from its raw materials to its finished state in the most time and money efficient manner possible how the supply chain is managed has an impact not only on the quality of the product and the service but also on the distribution costs and overall customer experience

supply chain management is a massive undertaking that needs firms to reevaluate the method in which they operate their supply chains blockchain iot and ai technologies for supply chain management discusses the problems and difficulties that the facilitators of the supply chain confront in addition to the possible solutions to such problems and difficulties this book will be the only one of its kind to address the impact of covid 19 on supply chain systems involving different stakeholders such as producers dealers and manufacturers and will provide a foundation for future research opportunities that will allow for the unrestricted expansion and prosperity of business it will serve as a foundation for academics scientists and educationists interested in the use of modern technologies in the field of supply chain management such as the internet of things iot artificial intelligence ai and blockchain in addition to those engaged in research undergraduate and postgraduate students in higher education can also use this publication as a reference book this book also presents a multifaceted perspective for the general public including topics such as computer science the food business hotel management fashion medical inventory management and agricultural spheres

this book presents select proceedings of the 2nd biennial international symposium on fluids and thermal engineering flute 2023 it covers latest research trends in the areas of production engineering and technology such as sustainable manufacturing processes rapid prototyping process planning production scheduling manufacturing management and automation metrology optimization methods for production processes developments in casting welding machining materials and machine tools the contents of this book are useful for researchers and professionals working in the areas of manufacturing and materials engineering
