since the mid twentieth century zoltán kodály s child developmental philosophy for teaching music has had significant positive impact on music education around the world and is now at the core of music teaching in the united states and other english speaking countries the kodály today handbook series is the first comprehensive system to update and apply the kodály concepts to teaching music in elementary school classrooms kodály in the fifth grade classroom provides teachers with a step by step road map for developing children s performance creative movement and literacy skills in an organic and thoughtful manner through six years of field testing with music kindergarten teachers in the united states great britain and hungary the home country of zoltán kodály

authors Micheál Houlihan and Philip Tacka have developed a methodology specifically for 21st century classrooms. Houlihan and Tacka use the latest research findings in cognition and perception to create a system not only appropriate for the developmental stages of first grade students but also one which integrates vertically between elementary music classes. The methods outlined in this volume encourage greater musical ability and creativity in children by teaching them to sing, move, play instruments, and develop music literacy skills. In addition, Kodály in the fifth grade classroom promotes critical thinking, problem solving, and collaboration skills. Although the book uses the Kodály philosophy, its methodology has also been tested by teachers certified in Orff and Dalcroze and has proven an essential guide for teachers no matter what their personal philosophy and specific training might be. Numerous children's songs are incorporated into Kodály in the fifth grade classroom, as well as over 35 detailed lesson plans that demonstrate how music and literacy curriculum goals are transformed into tangible musical objectives. Scholarly yet practical and accessible, this volume is sure to be an essential guide for kindergarten and early childhood music teachers everywhere.

As former elementary school teachers, the authors focus on what is possible in schools rather than a romantic vision of what schools could be. Based on a 5-year study of an elementary school, this book shows how civic engagement can be purposeful and critical, a way to encourage young people to examine their environment, to notice and question injustices, and to take action to make a difference in their communities and schools. Focusing on the intersection of student voice and critical inquiry, the book describes how to embed civic engagement into curriculum, school decision-making processes, and whole-school activities. Chapters provide an overview of what research has demonstrated about civic engagement at the classroom, school, and community levels, including detailed descriptions of activities and lessons for practice. Classroom teachers, school principals, community members, and teacher educators can use this resource to foster a deeper, richer understanding of what is entailed in civic life. The book features a vivid portrait of a typical public school that wants to do more than teach to the test; an examination of the conditions that enable young people to participate in democratic practices, including identifying and questioning injustices; concrete examples of student voice and critical inquiry in classroom contexts; practices and activities that encourage children to get along with others, exchange perspectives, and work across differences; offers a suggestive range of evidence that high-quality civic engagement initiatives can enhance students' academic, social, and emotional engagement; it reveals the gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem solving, peer collaboration, literacy, and social studies learning and development of empathy and mutual trust. From the foreword by Meira Levinson, Mitra and Serriere show us not only that elementary-aged children are capable of civic engagement but how such engagement can be nurtured in the classroom. Children can be active civic participants. This book demonstrates both the power of this idea and how we might accomplish this essential task. Beth C. Rubin, Rutgers University.
